<https://kb.netgear.com/24322/How-do-I-set-or-edit-static-routes-on-a-NETGEAR-router>

[Skip to main content](#)[Log In](#)

Ok, I had exactly what you put in there with the exception of the metric value. I used 2 because the Orbi router requires a metric greater than 1 and less than 16. So using 1 or 16 actually throws an error message.

Now, I got it to work thanks to your feedback. Knowing I had the route set up right, I started doing some investigating. You ready for this? I made changes to the VPN which required a peer update. Guess what I didn't do? Yup, I never updated my peer 🧑. So yes, I'm the idiot today 😂. Thank you for your help!
