PUID and PGID set are not being honored #126

✓ Closed[This-will-be-your-username](#) opened this issue on Mar 1, 2022 · 2 comments[This-will-be-your-username](#) commented on Mar 1, 2022

linuxserver.io

Expected Behavior

Docker configuration honors the PUID and PGID set in docker-compose.

Current Behavior

New files that are downloaded have the owning user and group as `911`. Reading online this is apparently because the PUID and PGID aren't set. However, they are set for the container.

Steps to Reproduce

1. Copy docker compose YAML and paste into config
2. Create new user account `sudo useradd -r -s /bin/false username`
3. Modify user's primary group `sudo usermod -g group username`
4. Grab user ID and group ID, put into docker compose.
5. Activate environment `sudo docker-compose up -d`
6. Change SAB settings in UI to point complete and incomplete downloads to configured folders.
7. Download something

Environment

OS: Ubuntu 20.04.3 LTS

CPU architecture: x86_64

How docker service was installed:

docker repo

Command used to create docker container (run/create/compose/screenshot)

```
sabnzbd:
  image: lscr.io/linuxserver/sabnzbd
  container_name: sabnzbd
  environment:
    - PUID:991
    - PGID:1001
    - TZ=Country/City [redacted]
  volumes:
    - /path/docker/config/sabnzbd:/config
    - /path/downloads:/downloads
    - /path/downloads/incomplete:/incomplete-downloads
  ports:
    - 8082:8080
  restart: unless-stopped
```

Docker logs
