Netracells

[61](#) [EDIT](#)

The Netracells are secured by Keyglyphs found only in the Anchorhold. To leave the Anchorhold, the squad must carry all four Keyglyphs. Be wary; the Keyglyphs bestow a heavy burden on those who possess them.

SEARCH PULSES identify Netracells, and The Sanctum Anatomica can only generate 5 Search Pulses per week. Use them wisely.

Lore & History

General

Named after the [Requiem Word](#) for Decay, **Netracells** are the private research vaults of the prominent  [Orokin](#) scientist, **Albrecht Entrati**. They were often sealed with hazardous **Keyglyphs**; unique keys designed by Albrecht as an added security measure to give the lab's defenses an advantage, should a Keyglyph fall into unknown hands.

All manner of Albrecht's personal items and treasures were stored within the cells.

WARFRAME Wiki

After leaving the Anchorhold, players must search for the Netracell vault. There are three marked **Pom-2** terminals that can be [hacked](#) to assist in narrowing down the vault's location. Once the vault is located and one of the four correct Keyglyphs is inserted, players must fend off waves of enemies within the marked location to reduce the **Netracell**

The Anchorhold

Security Level. Each enemy killed while standing in the marked location (enemies themselves do not need to be in the area, only players) reduces the security level by **0.5%**. At around **67%** and **33%**, a [Necramite](#) drone will spawn and halt progress until it is destroyed, and enemies will begin to spawn in more intensely at **25%**.

Once the gauge is fully reduced, all nearby enemies (except [Mocking Whisper](#) or [Scathing Whisper](#) if present) will instantly die and players can open the Netracell to gain access to the valuables within, while also removing their Keyglyph's debuffs.

- applied.

This cooldown affects all sizes of the Restore type.

—In-Game Description

Considered to be extremely difficult with many debilitating restrictions and level 220 - 240 enemies, it is recommended to attempt this mission in full squads.

- **Empowered Enemies:**

- Enemies have their [Health](#) and [Shields](#) increased by **100%**, and an additional **50%** for each squad member up to a maximum of **300%**.
- [Eximus](#) have a higher spawn rate.

- **Restricted Respawns:**

- [Self-revive](#) is not allowed. **A player that dies is permanently out of commission and cannot be brought back**, making death prevention and prioritizing reviving fallen Tenno from bleedout a necessity. A dead player may also lose their eligibility for rewards once the 2-minute [Inactivity Penalty](#) triggers.
- [Last Gasp's](#) drain begins **2** seconds earlier with each use.
- Bleedout timer reduces with each revive, down to a minimum of **5** seconds.

- **Restricted Consumables:**

- Deployable allied units such as [Specters](#) and [On Call Crew](#) cannot be used.
 - However, [Air Support Charges](#) to summon [Sentry Gun](#) or [Kahl Beacon](#) can still be used.
- [Team Bonus Consumables](#) have a **3** minute cooldown.

Rewards

Within the Netraccells contains many resource containers that yield [Credits](#) and [Entrati Obols](#). The main cache is guaranteed to drop an [Entrati Lanthorn](#) and one of the following: [Archon Shards](#) ([Crimson](#) ([Tauforged](#)), [Amber](#) ([Tauforged](#)), or [Azure](#) ([Tauforged](#))), Legendary Melee [Arcane Enhancement](#) ([Melee Crescendo](#) or [Melee Duplicate](#)); the contents of the reward is not revealed until players successfully extract. Completion also awards **5,000** [Cavia Standing](#).

Notes

- If a player dies or disconnects from the mission, any Keyglyphs in their possession will transfer to another player.

Tips

- The Netracell always spawns at the furthest point of the tileset, near the third hacking terminal and extraction. Much of the searching can be shortened by ignoring the first two terminals and following the waypoint toward the third terminal, scouting around the area after the Murmur tileset.

- Consider bringing the following Warframes:

- Healer** ([Trinity](#), [Oberon](#), [Wisp](#), [Garuda](#), [Nekros](#), [Harrow](#), [Khora](#), [Hildrynn](#), [Styanax](#), [Dante](#), or [Vazarin](#))
- High survivability** ([Rhino](#), [Nezha](#), [Inaros](#), [Chroma](#), [Gara](#), [Nyx](#), [Revenant](#), [Valkyr](#), [Citrine](#), or [Gauss](#))
- Specialized crowd controllers** ([Saryn's Spores](#), [Sevagoth's Gloom](#) ([Helminth](#) subsumable), [Titania's Lantern](#), [Mag's Pull](#) and [Targeted Magnetize](#), or [Vauban's Vortex](#))
- Warframes with [Overguard](#) like [Styanax](#) with [Intrepid Stand](#) or [Dante's Light Verse](#) and [Final Verse](#) are highly advised since Overguard counts as Health and absorbs every Keyglyph debuff, even the Energy drain.

- Equip survival mods ([Adaptation](#), [Quick Thinking](#), and/or [Rolling Guard](#)).
- Avoid straying too far from the squad to ensure they can reach a player in bleed-out in time.
 - Vazarin's [Mending Soul](#) is especially helpful at ensuring an ally gets up as quickly as possible and not miss the rewards by dying.
- Due to the drastically increased enemy [armor](#), bring abilities that can remove such defenses ([Ember's Fire Blast](#) ([Helminth](#) subsumable), [Nyx's Psychic Bolts](#), [Hildrynn's Pillage/Blazing Pillage](#) ([Helminth](#) subsumable), [Xaku's The Lost](#), [Caliban's Fusion Strike](#), [Styanax's Tharro Strike](#) ([Helminth](#) subsumable), or [Unairu's Magnetic Flare](#) and [Caustic Strike](#)).
 - Note that [Rogue Voidrigs](#) and [Rogue Bonewidows](#) are immune to armor removal. Their Alloy Armor is vulnerable to [Radiation](#) damage.
- [Nova](#) with reduced [Ability Strength](#) to increase enemy movement speed using [Molecular Prime](#) can greatly assist in having enemies rush into the Netracell Security Level kill zone and speed up the mission.
- A Keyglyph's health drain counts toward [Chroma's Vex Armor](#).
