General Information

Sell Price  Cannot Sell

Introduced [Update 25.8](#) (2019-10-01)

A 3-day booster is also offered as a periodic item for sale by [Baro Ki'Teer](#), costing  **500** and  **175,000** to purchase. Note that Baro Ki'Teer's stock changes with each appearance, and may not be available on a succeeding appearance.

Official Drop Tables

<https://www.warframe.com/droptables>

Notes

- Doubles the chance of rolling an enemy's Mod, Endo, and Arcane [drop table](#).
 - Does not affect drops from mission reward tables or [Resource Cache](#) drop tables.
- A Mod Drop Chance Booster becomes active immediately upon purchase and expires after the indicated days of real-time (not time played in the game).
- All Boosters are cumulative, meaning that purchasing or attaining additional boosters while a booster is already active will add their time to the existing booster.
- Like the [Resource Drop Chance Booster](#), the Mod Drop Chance Booster is applied to the whole team. This means **all** players on the team will have increased Mod Drop Chance from **one** player's Booster, regardless of who does the killing.
- Multiple Mod Drop Chance Boosters from more than one player on the team **do not stack**.
- A Mod Drop Chance Booster is automatically applied during any [Steel Path](#) mission.
 - All Steel Path missions have an innate 2x Mod Drop Chance from the active modifiers (without a booster).
 - This itself **can** be stacked with a single Mod Drop Chance Booster from any of the players on the team, giving a maximum total **4x** Mod Drop Chance.
- Does **not** apply to [bosses](#).
