## CODEX

This Lich-variant grenade launcher hurls mayhem and destruction with an increased Reload Speed.

The **Kuva Tonkor** is the [Kuva](#) variant of the [Tonkor](#) grenade launcher, sporting increased [critical chance](#), [status chance](#), reserve ammo, [reload speed](#), damage and a wider spread of damage types, as well as removing the minimum arming distance thus making the grenades explode on impact and even at closer ranges - which can stagger its wielder.

## Acquisition

Kuva Tonkor is obtained by vanquishing a [Kuva Lich](#) who generated with one equipped. After the Lich is vanquished it will be in the player's [Foundry](#) ready to claim.

While the weapon itself is not tradeable, a converted Kuva Lich generated with the weapon can be traded to another player. The trade is performed inside a [Clan Dojo](#)'s Crimson Branch room, and the recipient must not have any active Lich. Once traded, the recipient must fight and vanquish the Lich to claim its weapon.

- While its standard counterpart's grenades fizz out when shot at too close ranges and hitting someone due to the arming distance mechanic, the Kuva Tonkor's shots explode on impact even at point blank range, making it more reliable at dealing massive damage at close ranges. It does give a risk at staggering the user.

## Kuva/Tenet Notes

- For weapons obtained from vanquishing the [Kuva Lich](#) or [Sister](#):
  - The player **does not** have to meet the [Mastery Rank](#) displayed to obtain this weapon. It can simply be claimed from the foundry after the Lich/Sister carrying it has been vanquished.
  - The weapon will have a prefix of the name of the Lich/Sister it was acquired from (e.g. a [Kuva Kohm](#) might be called "**Odizrigg Agekk** Kuva Kohm").
- Refraining from Mercy killing an Adversary candidate will remove their weapon from the pool of potential Adversary weapons until each has been refused, but only if the mission is completed. Weapons rejected from aborted missions will remain in the current cycle.
- For weapons obtained from [Ergo Glast](#)'s shop:
  - The player **must** meet the [Mastery Rank](#) displayed to obtain this weapon, as it is claimed from an NPC shop rather than the foundry.
- The weapon's max [rank](#) caps at **40** after **5 polarizations** (max rank increases by 2 per [Forma](#) added).
  - Additional polarizations can be added when the weapon reaches its new max rank at that polarization level.
  - Each additional rank also gives 100 [Mastery Rank](#) experience, giving **4,000** points in total at level 40.
  - [Mod](#) capacity scales with the additional ranks, and can reach a total of **80** at rank 40 with an [Orokin Catalyst](#) installed.
    - Without an Orokin Catalyst, the max is 40. Combined with the five polarized mod slots required to reach that point, an Orokin Catalyst

er-friendly builds as they

al mod capacity above 30 (60)

reaches 31 and above.

- Legendary [Mastery Rank](#) increases the minimum mod capacity for such weapons, without the weapon needing to be rank 31 and above. For example, Legendary 1 increases the minimum capacity to 31 (62 with an Orokin Catalyst).
- Comes with an additional damage stat.
  - For Lich/Sister-obtained weapons this is dependent on the Warframe that summoned the Lich/Sister.
  - For [Ergo Glast](#) shop a random bonus stat will be offered for each weapon and changed every 4 days (96 hours).
  - This damage stat randomly ranges between 25%-60%. It can be upgraded up to its maximum value with [Valence Fusion](#) using another copy of the weapon.
  - This bonus stat is considered a **base** damage type and will be applied **after** all elemental mods for the purposes of elemental combinations.

## Tips

- With [Primed Magazine Warp](#), the Kuva Tonkor will have  $1 \times (1 + 55\%) = \mathbf{1.55}$ , rounded to **2** magazine capacity, giving it a higher overall DPS rate.
- As with the standard Tonkor, the Kuva Tonkor's high critical chance makes it a good candidate for [Hunter Munitions](#).
- While the Kuva Tonkor's shots lack the cluster-bomb effects of the [Kuva Bramma](#) and [Kuva Zarr](#), its very large ammo reserves (for a launcher-type primary) and comparable damage grant it a better ability for sustained crowd control in endless [Steel Path](#) missions, especially when loaded with ammo conversion mods such as [Vigilante Supplies](#).

## Trivia

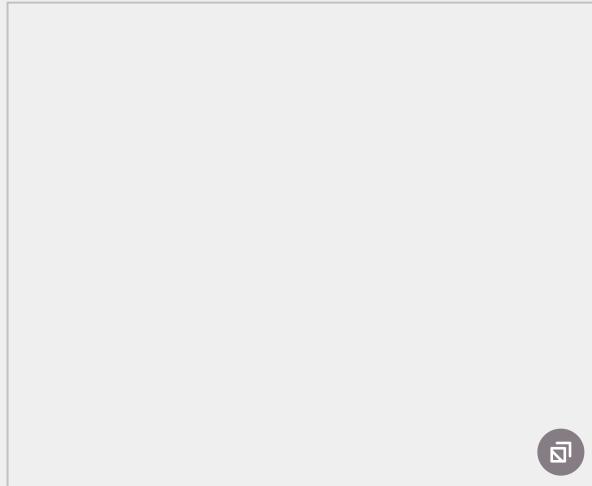

- The [Grineer text](#) on the side of its barrel translates to "Ravage".
