Mechanics

As with all Duviri content, players begin in [Teshin's Cave](#) with a selection of randomly generated [Warframes](#) and weapons that change at the start of every Duviri spiral. This selection can be viewed within the player's [Navigation Console](#), once you reach Rank 4 Opportunity [Intrinsics](#) and can be changed by choosing to extract after beating any stage. Failing by aborting or through any mission's fail condition will not change their selection, allowing players to retry with another configuration, so long as the spiral has not yet changed.

The Circuit primarily features traditional Warframe gameplay. The game cycles between random mission types and [tilesets](#) as stages are cleared.

Possible mission types:

- [Defense](#) (Defend stationary target for 3 waves)
- [Survival](#) (Survive for 5 minutes)
- [Excavation](#) (Excavate 300  [Cryotic](#))

- [Void Flood](#) (Seal 5 Ruptures)
 - Unlike traditional Void Flood, no corruption gauge is present. As such this mission type does not have a failure state.
- [Corrupted Jackal Assassination](#)
 - Appears every 5 Stages.
 - This version of the [Jackal](#) has slightly different mechanics:
 - It has only 3 health bars instead of the usual 4.
 - The field it patrols in is protected by a spherical barrier that nulls all outside gunfire, but can be physically passed through.
 - During its Grid Wall attack, the Jackal additionally fires seeking projectiles.
 - After depleting one of its health bars, it will teleport to another part of the field, spawn numerous enemies, and become invulnerable until all its reinforcements are killed. It will continue to attack during this phase.
- [Alchemy](#) (2 Crucibles)
 - No conversion process; a Crucible is considered completed after being filled.

Although the order of the mission types during each run of the circuit is chosen at random, the order for that run will stay the same if the squad stays for enough stages to begin repeating. For example, if stage 1 is Exterminate, stage 2 is Survival, and stage 3 is Excavation then stage 8, 15, 22, etc. will be Exterminate, stage 9, 16, 23, etc will be Survival, and stage 10, 17, 24, etc will be Excavation.

[Gear](#) items and [Companions](#) cannot be used. However, all players will have innate [Enemy Radar](#) in The Circuit.

Enemies do not drop [Origin System](#) loot such as [Mods](#) or [Resources](#), but will still drop [Health and Energy Orbs](#) and [ammo pickups](#).

During each stage, players can find 3 blue diamond-shaped objects called Decree Fragments scattered across the map, often placed within secluded locations. Collecting them all awards 1 [Decree](#) to all players in the squad, lasting for the mission. They produce a sound similar to Trauma Clamps, though at a slightly higher pitch, when near a fragment.

A Decree Fragment

Traps called **Trauma Clamps** can be found throughout the environment. Breaking them releases a vortex that pulls in both players and enemies, with the radius being larger for enemies, dealing  [Void](#) + player healing pulses (Joy), [Heat](#) (Anger), [Toxin](#) (Envy), [Cold](#) (Sorrow), or [Electricity](#) (Fear) damage and status.

Rewards

Resources

[Rune Marrow](#) is found exclusively in The Undercroft areas from breakable Runic Compacts and is guaranteed to drop from [Corrupted Vor](#) and the [Corrupted Jackal](#).

Completing a stage as well as gathering 3x Decree Fragments awards Duviri resources, [Drifter Intrinsic](#)s, and a [Decree](#).

Tiers and Weekly Rewards

In addition to the above rewards, completion of subsequent stages in a run grants Circuit Progress to claim tier rewards.

- Stage 1: 100 Circuit Progress
- Stage 2: 110 Circuit Progress
- Stage 3: 125 Circuit Progress
- Stage 4: 145 Circuit Progress
 - Also awards an additional 50 Circuit Progress once per day.
- Stage 5 and onwards: 170 Circuit Progress

Tier rewards can only be claimed once per week. Weekly reward pools [reset](#) on Monday 0:00 UTC.

Tips

- Take the time to search for [Decree](#) fragments, especially before starting a [Defense](#) or [Excavation](#) wave.
 - Fragments are often placed in secluded spots, such as small corners, edges of cliffs, on top of houses, or inside caves.
 - Fragments emit a distinctive sound when nearby.
- Certain [Drifter Intrinsic](#)s take effect for Warframes:
 - [Combat](#) grants a damage bonus per Decree stack (Rank 1) and increases weapon critical chance (Rank 7).
 - [Opportunity](#) grants more available Decrees (Rank 1, 3, 5, and 6), as well as

- [Endurance](#) grants extra health per Decree stack (Rank 1), full health and energy restore upon selecting a Decree (Rank 2), additional revives (Rank 3 and 8), health regeneration over time on headshots (Rank 7), and avoiding death at a cooldown (Rank 10).
- [Riding](#) provides **no** benefit, as [Kaithes](#) cannot be used in The Circuit.

Patch History

Hotfix 36.1.6 (2024-09-05)

- Fixes towards Circuit mission objectives not starting after Host migration.
- Known issue: this still occurs when transitioning from Alchemy to Excavation.
- Fixed Clients' Drifter reverting to their non-Duviri state after a combination of Host migration and Transference when completing a round of the Circuit.
- This should address cases of players losing large amounts of Standing after dying at the end of a Circuit or Undercroft Stage in this state.
