# Daily Tribute

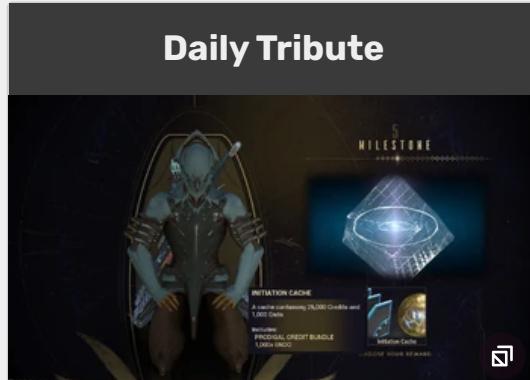

[563](#) [EDIT](#)[V QUOTES](#)

Welcome back, Operator!

—Ordis, upon logging in

The **Daily Tribute** system is the [reward system](#) introduced in [Update 18.0](#) (2015-12-03), replacing the [Login Rewards](#) system on December 3, 2015.

Upon logging in to the game for the first time a day, players will be granted a random reward out of the Daily Tribute reward pool. New log-in days becomes available everyday at 00:00 UTC. Players also receive rewards upon accomplishing a **Milestone**, a set number of log-in days required to unlock a single guaranteed listed reward, with more valuable items requiring more log-in days to unlock. Log-in days are accumulated into a player's total, counting towards any milestones yet to be completed. Only the total number of log-in days are taken into account by the Daily Tribute system, regardless of player hiatus, i.e. a player who logs in consecutively for 7 days, skips a day, then logs on the day after will still

**WARFRAME Wiki**

Daily Tribute rewards are random, but the chances of more frequently acquiring rare and higher value items increases as players increase their [Mastery Rank](#), with higher ranks having higher chances of receiving better rewards. Each Mastery Rank increase adds 5% to increased rare drop chances.<sup>[1]</sup> (Currently not working as this would completely exclude "Common" drops at MR20 and up)

Additionally, the first mission completed after 00:00 UTC will have double the [Credit](#) reward, also known as the *Daily First Win Bonus*. This **does not** work on the Credit caches gained from winning an [Index](#) match, nor any bounty or heist in the [Plains of Eidolon](#) or [Orb Vallis](#), but **will** consume the daily credit bonus. This stacks with [Credit Boosters](#) and active Double Credit events. Daily Tribute will refresh in:

## Patch History

- Daily Tribute reward scaling is now capped at 3000 days. This is a preemptive measure! The first time 3000 days can be hit will be in March 2024.
  - The Daily Tribute system was first introduced in Update 18.0 (2015-12-03) and if you've been around long enough to hit day 3000 in 2024, thanks for sticking with us! Ultimately, we want to ensure the longevity of this system by proactively putting in measures that prevent an unbalanced reward system caused by indefinite scaling.
  - Players will continue to receive rewards beyond this milestone (and the
