# Internal Bleeding

[55](#) [EDIT](#)

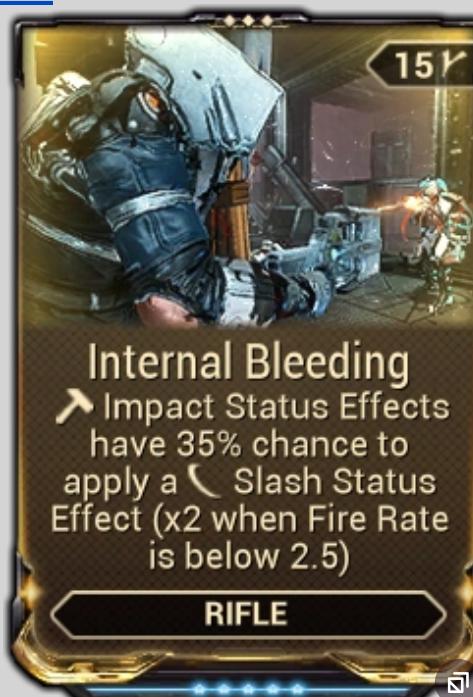

**Internal Bleeding** is a rifle [mod](#) that gives every  Impact status effect a chance to produce an instance of a  Slash proc. This chance is doubled when the weapon's [fire rate](#) is below 2.5.

Sourced from the [official drop table repository](https://www.warframe.com/droptables) (<https://www.warframe.com/droptables>). See [Module:DropTables/data](#) to edit on the wiki.

## Notes

- Cannot produce multiple procs in a single instance of damage alongside any other Slash sources, such as a weapon's innate Slash, Hunter Munitions, or the debuff from Seeking Talons.
  - Procs of Hunter Munitions and **Internal Bleeding** are drawn independently, and if both proc at the same time, only 1 slash proc is applied. With both mods, if a shot both crits and applies impact status, the probability of Slash proc is 54.5% (with attack speed > 2.5) or 79% (with attack speed <= 2.5).
- Proccing impact more than once in a single instance of damage will not allow this mod to proc more than once, nor will it increase the chance of the mod proccing.
- Hard Engage works with this mod.
- Fire Rate buffs such as Gauss' Redline, Wisp' Haste, Reservoirs and

- may increase the weapon's fire rate past 2.5.
- If the weapon's fire rate is exactly 2.5 it won't count towards the 70% chance.
  - For bows, the threshold is still depending of the Fire Rate, even if it is an hidden stat. Most bows have an unmodded Fire Rate of 1, except : [Cinta](#) with 1.5 Fire Rate, and [Kuva Bramma](#) and [Nataruk](#) with 0.667 Fire Rate.

## Tips

- [Critical Delay](#) has *potential* synergy with this mod, due to its **fire rate** penalty reducing fire rate below 2.5 on some weapons.
- Some primary weapons have *guaranteed Impact status effects*, so gain the most direct benefit from this mod.
  - [Acceltra](#) (direct hit)
  - [Daikyu](#)
  - [Fulmin](#) (within 9m)
  - [Javlok](#) (fully charged alt fire explosion)
  - [Kuva Chakkhurr](#)
  - [Kuva Ogris](#) (direct hit)
  - [Lenz](#) (direct hit)
  - [Nagantaka](#)
  - [Nataruk](#) (quick shot)
  - [Quellor](#) (within 18m)
  - [Scourge](#) ( [Prime](#)) (alt fire explosion)
  - [Shedu](#) (upon depleting mag)
  - [Stahlta](#) (alt-fire direct hit)
  - [Tombfinger \(Primary\)](#) (direct hit)

## Patch History

### Update 33.0 (2023-04-26)

- Fixed many mods that previously worked on Exalted Weapons not correctly applying, for example (but not exclusively) Internal Bleeding when installed on Ivara's Artemis Bow.

### Update 29.10 (2021-03-19)

- Introduced.

## See Also

- [Hemorrhage](#), the Pistol version.
