Titania is my Index farm "Weapon".

I know it's a tad more difficult to achieve than a weapon alone, but Titania makes Index farming trivial.

Fleeting Expertise and Streamline make her Razorwing mode hit the lowest amount of Energy Drain that it can (I know it goes over the 175% efficiency cap, but the fact that she has negative duration means that the extra efficiency kicks in, it just doesn't show in the UI)

If you leave Duration and Efficiency alone after the two mods mentioned above, get as much Ability Strength on her as possible and Razorwing Blitz.

After that you're good to go, mod her Pistols for Corrosive+Cold, or Viral (since the pistols do Slash damage) and as much status/Crit as you can.

You should be able to handle the top tier index easily, do the first 2 levels, extract, repeat (3 levels if you can, but the enemy level scales quite quickly if you don't have a dedicated build)

Enemy radar on her for Index is amazing, you can essentially kill the mobs as they spawn.

Change her Hold abilities so you can spam Spellbind on herself without having to hold 1 (her first ability) so you can keep Razorwing Blitz buff active.

Both maps have energy fonts that you can farm to keep her in flight at high financial stress

There are many options

I like running wisp - the speed and health boost is nice to offset hauling around too many tokens. And the zappy turrets she can pop down CC the enemies.

From there its just a question of bringing as much dakka and choppy as you can. You cannot bring enough dakka.
