SEVAGOTH PRIME BUILDS

BUILDS BY TONYGRIZZ

# Sevagoth - The Immortal Nuker (Health Based Tank Build)

[Sevagoth Prime] is here and he gets to make use of 2 amazing augments!

## The Nuke

The bread and butter to this build is to cast sow on an enemy and follow it up with reap causing a rippling nuke blowing up all enemies in your way!

[Lycath's Hunt](#) is for reliable health and energy orb drops however you can use [Roar](#) if you have another method to obtaining orbs, if going this route I recommend [Sahasa Kurbrow](#) with Synth mods and [Dig](#)

## The Immortal

Using [Lycath's Hunt](#) you will stack on on health super fast however my trick to survivability is through Archon Shards, if you use 1 Tauforged Topaz shard you can gain 2 health per enemy killed with Blast Damage maxing out at 450 health! On my build im running 2 of these along side blessing capping my health out at 2550 health so no need for shield gating build!

## How do I keep Lycath's [Hunt] up permanently?

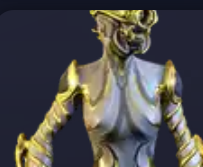

I tried alot of different weapons and I found [Strun Prime](#) with incarnon to make this a cake walk, this weapon increases the duration of Lycaths [\[Hunt\]](#) by easily applying over 5 status effects with each fire!

If you are a big fan of Shadow then this build is not for you as this is a build for full focus on [\[Sevagoth\]](#)'s abilities which I find alot more fun, I also found that most people do the classic [Catalyzing Shields](#) and [Brief Respite](#) on him which I find a boring playstyle so I hope this can give people a more entertaining unique build to use!!
