Are there any Good pc alarm clocks?

I would like to download one that I could use, preferably one with an adjustable alarm sound. Thank you for your time.

AFAIK that's an Android alarm app, not a pc one :P I've used AIMP (music player with alarm option, pretty cool to wake up to the sounds of some online radio).

Is there a simple, free ad-free alarm app that DOESN'T automatically turn off if you don't wake up unlike the stock alarm app?
