Galvanized Acceleration

[COMMENT 5](#) | [EDIT](#)

Galvanized Acceleration is the [Galvanized](#) variant of [Fatal Acceleration](#), increasing [Projectile Speed/Beam Length](#) and increases the effective range of shotguns before [Damage Falloff](#) takes effect. Kills grant a buff that further increases projectile speed/beam length for 10 seconds and stacks up to 2 times.

Acquisition

This mod can be bought from the [Arbitrations](#) vendor in the [Arbiters of Hексis](#) room in [Relays](#) for 20  [Vitus Essence](#).

Notes

- When the buff times out, one stack is lost and the buff duration resets.
- Only kills from a weapon equipped with this mod will give stacks, and only the weapon equipped with this mod will benefit from the buff. If equipped on both a normal weapon and an [Exalted Weapon](#), it will affect both weapons.
- Kills from status procs from a weapon equipped with this mod will give stacks.
-  [Sinister Reach](#) will not be affected by this mod as it gives a flat beam length increase after percent bonuses.

Trivia

- Currently, there are no Galvanized counterparts of this mod for primary rifle/primary beam weapons, nor secondary/secondary beam weapons (there are no Galvanized variants of  [Terminal Velocity](#),  [Sinister Reach](#),  [Lethal Momentum](#) and  [Ruinous Extension](#)).
- Similarly, while primary rifles and secondaries have access to  [Galvanized Scope](#) and  [Galvanized Crosshairs](#), both of which are Galvanized variants of  [Argon Scope](#) and  [Hydraulic Crosshairs](#), primary shotguns do not have a Galvanized variant of  [Laser Sight](#), which functions identically to the two mods mentioned (but grants a slightly lower critical chance bonus). It is unknown why Laser Sight, while also being a mod that dropped from the Acolyte [Torment](#) in the past, did not receive this treatment.
- Interestingly, this mod combines the effects of two mods, namely  [Fatal Acceleration](#) and  [Sinister Reach](#) into one, granting bonus projectile speed and beam length, whereas the former (the mod that Galvanized Acceleration is based on) offers only bonus projectile speed.

- This may be because the developers did not want to create an extra Galvanized range mod for beam shotguns (like the  [Phantasma](#)) and thus simply combined both effects into one mod.
- Galvanized mods were released in batches of 3 for each weapon type they were made for (primary rifles, primary shotguns and secondaries), and since the other two slots for Galvanized shotgun mods were taken up by  [Galvanized Savvy](#) and  [Galvanized Hell](#), it is possible the developers decided to combine the two shotgun mods mentioned into one, to avoid making an extra Galvanized mod for primary shotguns.
