Hildryn is the ugliest frame with an unnatural body. She is disgusting and fat. Her animations imply she acts manly which is also gross.

Strange how everyone was excited by voruna because she is actually attractive whereas noone wanted this piece of lard. I remember selling hildryn prime sets for 25p because no one gave a shit about her.

Someone should add this:

- Ember's subsume "Fire Blast" won't work on Hildryn. (the game will say "need more energy")

If this is a bug or 'intended' i have no idea.

Other subsume working fine. Have not tested ember on others Hildryn slot. but i guess will have the same results.

[A Fandom user](#) • 7/11/2024

Noticed that too, it stopped working when Ember rework went live.

[A Fandom user](#) • 8/10/2024

Definitely has to be a bug

I always find it funny that the general consensus for both Hildryn and Harrow is that they would both like the other's helminth skill more than their own to be most effective.

Hildryn loves replacing Pillage with Condemn because it's very cheap and the shield restore is instant giving her something to cast when she's about to run out to give an instant refill to what is both her defense and her energy, while also giving her some great CC.... Meanwhile Harrow loves replacing Condemn with Pillage because the long delay before shields are returned makes his combo flow so much smoother, it scales better on the stats Harrow actually likes to build, and it gives him armor strip which he wants, (while also not CCing enemies because he likes being shot at).

A Fandom user • 8/28/2024

The armor strip from Pillage makes it much stronger, and a subsume slot is better used over Hildryn's 1 or her 4 for most builds.

One bug i have been noticing about her is that sometimes, when wielding double pistols, the animatoin for their arms work in a wierd way

Will energy orb efficiency (amber shards) affect the amount of shields you get ?
Will health orbs give me shields if i use Equilibrium ?

TrapperCZE • 4/28/2024

Maybe stupid question but if you have sources for reduced damage effects like aviator (DR while airborne) does that in any way affects shield cost/drain ?

A Fandom user • 5/14/2024

https://warframe.fandom.com/wiki/Damage_Reduction

[A Fandom user](#) • 5/15/2024

No. Shield Cost is treated like energy. Aviator still helps with tankiness however (since you can't use armor).

[A Fandom user](#) • 9/4/2024

Hildryn's body shape is unnatural and disgusting. Toned women can be very

each other. I have never seen a woman who works out 7 hours a day then proceeds to eat 7 hours after that. That is hildryns body type. Gross

Seems they limited how much energy and health voracious metastasis helmith ability gives, as before it would give the full amount and now is limited

[A Fandom user](#) • 11/11/2023

But at the end of the day, who the fuck would even care about Voracious Metastasis for supporting your teammate with free energy, when the absolute best helminth ability for gym muscle mommy is literally Elemental Ward, as does almost what her ult should do, but in an infinitely better way? lol

[A Fandom user](#) • 12/20/2023

"Who the fuck would even care?" Most people who know how valuable the amount of energy a Metastasis Hildryn can pump out for an extremely negligible cost that can be easily rectified, actually.

[A Fandom user](#) • 12/20/2023

Same user as above who wants to add onto the OP's post; with my 45% EFF 73% DUR build, I can pump out 106 E/PS for 7.75s, which is hilariously good. Metastasis is still extremely strong on Hildryn for supporting, and it doesn't even sacrifice something important in her kit like Armor/Shield Strip to do so, unlike Trinity.

Obviously you aint put on arcane blessing if your hild can die to toxin

[A Fandom user](#) • 9/2/2023

The 3rd line on her ability page says overshield protects her from toxin. If you can't maintain overshields as hildryn I don't know what to say to you.

[A Fandom user](#) • 11/11/2023

"Obviously you aint put on arcane blessing if your hild can die to toxin"
I mean, if you're so much braindead to refuse swapping out in operator mode as soon as you get hit by a toxic proc, it certainly won't mean that this frame is trash Imao
