PROTEA PRIME BUILDS

Temporal Artillery: I've got a turret stuck on my head!

Temporal Artillery + Temporal Erosion is very strong! :D

I'm currently rocking **3 tau reds on Duration**, a **non-tau purple on [Equilibrium]**, and a **tau yellow on Casting Speed!** (You can use whatever suits you!)

Even if you don't use the augments on this build, [\[Equilibrium\]](#) (the mod and the purple shard buff) are insanely good on [\[Protea\]](#), because **her Dispensary drops enhanced Health Orbs that heal 100 HP rather than 25, which is much stronger than the Energy Orbs it drops which only give 25 Energy.**

This build is quite spammy, but you *can* get out of situations where your anchor is forcing you into one spot by **holding the ability cast button to disable it without rewinding!**

If you want your armor stripping to go faster, I recommend building up [\[Protea\]](#)'s passive strength buff *before* casting her Temporal Anchor, and then immediately casting her [\[Blaze\]](#) Artillery.

During your Temporal Anchor, I recommend spamming your Grenade Fans to charge up [\[Protea\]](#)'s passive to place enhanced Shield Satellites or Dispensaries! (The extra strength can go a long way for both.)

If you want to guarantee you'll have enough energy at the start of a mission, you should make sure the first ability you cast is a Dispensary!

SWAPPABLE MODS

Regular Intensify and maybe even Precision Intensify (haven't tested it) would work if you don't have/can't use [\[Umbral\]](#)

[Health Conversion].

[Growing Power] is not required but the extra strength is nice.

[Archon Vitality] is a huge buff to your [Blaze] Artillery DPS, but if you don't have it you can always swap it for another strength mod or another survivability mod like [Vitality].

I hope this build and my advice is helpful! If you want to do anything differently, don't be afraid to! :D
