Question

Helloooo (ignore my username I know it has spoilers for another series)

I joined Warframe 2 months ago because of the recommendation of my brother. I have beaten the latest quests like Jade Shadows but still have HUGE trouble fighting against enemies with Level 40 and above, and I am still afraid of Spy and Interception missions.

Do you guys have any recommended MODS that

Any comments would be appreciated!

Speaking of which I am using a Saryn Prime/Excalibur Umbra with a Nataruk, Grimoire, and Syam.

Ay 2 questions.

1. Does wukongs clone prock ceramic dagger incarnon second passive" Gun and blade" where when you kill a enemy you gain 1 initial combo?
2. Any good builds for the prisma grakata? All I'm seeing are builds from years ago.

Wukong/Prime, Prisma Grakata, Ceramic Dagger Incarn

Totally Random... Ropalolyst appearing on Jupiter during invasion

Since Update 25, Jovian Concord when Wisp and Ropalolyst were first introduced, I never realized that

Here are a few screenshots I captured during an Invasion on Jupiter, Amalthea node.

Ay question.

Every time I look at a wukong prime video, it's always the same slam strat again and again. The only other strat I see is for spy missions, Which is just the slam strat but without slam. Idk I just wanna feel like I'm playing wukong, not kullvero or Loki. Any other strat would be nice.

Wukong, Loki, Kullervo

Ay question.

Is it better to use Naramon for weapon combo or zenzurik for energy for kullervo? Every time I use naramon, I don't got energy, but every time I use zenzurik I don't got my combo. Idk which is worse.

Kullervo

Ay question.

So I got the hate incarnon right, and I'm on the last evolution. I have kullevo so I can solo with hate, but the last evolution "ground finish enemys" is taking me so long. Is there a way to speed up the process?

What has been your longest or toughest Prime Part / Prime Bp Farm?

The Nautilus Prime Cerebrum took me 15 Runs with full Squads all with the correct Relic Radiant.
