How would energy mods interact with Hildryn?

Question/Request

Since she has no energy bar, I'm kinda curious how those mods would interact with her, like, if I add Flow, would it mean that I would get more shields instead? Also, which would be better for her when it comes to shield usage, efficiency mods or shield recharge mods? This is assuming that using efficiency mods would decrease the amount of shields her abilities use.

My guess is that they just won't impact her at all since redirection does not impact health only frames I think it's kind of a similar case.

That also makes me wonder how quick thinking will work since toxin/slash procs will be a huge weakness.

As others have said probably no effect. Nidus and Inaros don't get special interactions with shield mods and efficiency on Nidus doesn't change stack consumption, although they could surprise us and set a new precedent.

 2  ...**grondoval** • 6y ago

Shield mods have no use on Inaros and Nidus - I expect something similar with Flow / P.Flow on this buff bitch.

 3  ...**kholdstare90** • 6y ago

Looking into it, possibly shield recharge.

The recharge rate is $(15 + (0.05 \times \text{max shields})) \times \text{recharge mods}$.

{Fast Deflection, Fortitude, Vigilante Vigor}

Those 3 work additively so it becomes $(15 + (0.05 \times \text{max shields})) \times (0.9 + 0.8 + 0.6)$

I've seen people suggest universal forma for regular slots. Why not allow forma to be used on the same slot twice and keep both polarities?
