Revenant's mesmer skin prevents you from taking damage, as does valkyr's hysteria. having overguard *might* count as well.

I'm curious if just switching to spoiler mode works. They're not shooting my Warframe, then.

Just make your crew handle the invaders lol, they are much stronger than you think

Rhino no longer works for this, I tried it today, had iron skin on, got 3 boarding parties, cleared them all with no damage taken and it went complete. Hell, the third party I even cleared it without letting them hit my iron skin shield at all either and it still didn't count.

Let your Crew deal with it?
I got it by accident after my Lich dealt with it.

I just tried this, and it didn't give it to me 😞 I tried mesmir skin, killing them without getting shot, and hiding in my laser beam cannon thing while my crew handled it. I think it's bugged for me.

I think this mission was bugged. I try with, revenant, Rhino, Protea, Hildryn and try to let my crew kill the invaders, and nothing! Even the "how to" of this mission was bugged so... I gave up and will wait

I've seen people suggest universal forma for regular slots. Why not allow forma to be used on the same slot twice and keep both polarities?
