The Quills

100 EDIT

Secretive and respected, the Quills are the Unum's closest adherents. Strange and reserved, their bond to her and each other makes for a strange relationship with causality. "We are each one viewpoint within the myriad that comprises the Unum. We watch, we anticipate, we intercede."

The Quills are a mysterious monastic order that serve the equally enigmatic [Unum](#), a being who resides within the [Orokin](#) Tower at [Cetus](#) in the [Plains of Eidolon](#). They have very close ties to the [Ostron](#) people who also praise the Unum, and are seemingly knowledgeable about the secrets of the [Tenno](#). They are said to be able to divine the future, which combined with their information gathering prowess allows them to preemptively end threats to Cetus through their operatives.

The player will be able to ally with the Quills after completing both [Saya's Vigil](#) and [The War Within](#) [quests](#). Their hideout resides in a cave in the northeast part of Cetus, behind [Konzu](#)'s notice board, whose doors will only open for the [Operator](#).
