Four beasts, one heart. Voruna's loyal wolf pack makes for a deadly combination of strength and stealth. Beware the monstrous howl that heralds fangs of vengeance.

Release Date: November 30th, 2022

Beware the telltale bloodcurdling howl when the primeval hunt begins anew. Nightfall engulfs the hallowed moonlit shrine, where sacred beasts of claw and fang prowl. Heed the wolvern queen, **Voruna**, here she decrees her midnight feast. Reveling in feral carnage, her loyal lupine fiends, the silent **Dynar**, chaotic **Raksh**, ravenous **Lycath**, and ferocious **Ulfrun** ravage their prey once unleashed. Beneath lunar glow upon scarlet soil, tremble before her monstrous grin. Voruna and her wolves' hunt resumed in [Update 32.2](#) (2022-11-30): Lua's Prey.

 - Dynar is attached to her left shoulder and wears a small metal patch over its front eyes.
 - Raksh is attached to her right shoulder and has mouth straps on its jawline.

 - Chronologically, she was showcased before the 50th Warframe [Styanax](#), whose animated teaser debut came after in Tennolive 2022.
- As a community incentive for donation to the [Quest to Conquer Cancer 2022](#) (<http://www.warframe.com/qtcc>) campaign, the "Vote for the name for our Wolf-inspired Warframe" reward unlocked on October 21, 2022, in the official Warframe forums poll thread upon reaching \$70,000 CAD. The reward tier was originally set at \$80,000 CAD, then later shuffled forward to meet the internal development cutoff schedule.
 - Digital Extremes compiled a list of eligible names for the QTCC public poll reward, from the initial Design Council exclusive suggestion forum thread, which opened after Devstream 164 until October 14, 2022.
 - Once the QTCC poll closed, the top 5 names were used with *Voruna* coming out at first place, *Raksha* in second, *Lycath* in third, *Ulfra* in fourth, and *Dynara* in fifth.^[1] The runner-up names were given to Voruna's four wolf-heads; aside from *Lycath*, DE decided to alter the other three wolves' names to be more gender-neutral.^[2]
 - Voruna's name was suggested by Design Council member *Orabell*.
- The name *Voruna* is a variation of *Žvorūna*, a name synonymous to *Medeina*, the Lithuanian goddess of forests, trees, and animals. In Lithuanian mythology, she is described as a lone voluptuous and beautiful huntress often escorted by a pack of

- With the addition of Warframe [Passives](#) since [Update 18.13](#) (2016-05-27), Voruna is the first newly-developed Warframe to not possess a dedicated passive ability of her own. Instead, each of her four abilities enables in-mission selection of a passive effect by holding down the ability button.
- She was originally planned to release with [The Duviri Paradox](#), which was delayed until 2023 for further development. In Devstream 165, she was announced to release with Lua's Prey instead.
