Broken Warframes adrift in the  
Void converged to create Xaku.  
Together, they deal high damage.  
Xaku proves that the sum of the  
whole is greater than its parts.

## USE WITH (MUST/RECOMMENDED)

- 5 [Blue Archon Shard](#) for shield.  
or  
3 [Blue Tauforged Archon Shard](#) for shield and 2 [Red Tauforged Archon Shard](#) for duration.
- [Shield Osprey Specter](#) for increasing shield.
- [Link Armor](#) for companion.
- [Holster Amp](#) for exodia contagion / [Corrosive Projection](#).
- [Vigorous Swap](#) for exodia contagion / [Constitution](#).

## EXPLANATION

- INFINITE BUILD : Sustain health or energy or both using Health/Energy Regen/Augment/Skill [Hunter Adrenaline](#), for other mission than survival and for level capping, use [Equilibrium](#) instead.  
[Vampiric Grasp](#).
- GOD BUILD : Immortality by any means.  
[Armor](#).  
[Parasitic Armor](#) equal immortality.  
[Link Armor](#).  
[Arcane Blessing](#).  
[Link Health](#).
- SMEETA GOD BUILD : Immortality by any means.  
[Link Armor](#).  
[Link Health](#).  
[Hunter Recovery](#).
- ANALOGY : Importance Of This Build  
Lets say a person have a car. He want to travel from town to town. He need to drive manually which is tiring. Imagine he has tesla and can afk driving. Thats the same reason why u want this build. You can afk using [\[Xaku\]](#) for survival mission and grind a lot of thing including material and platinum. A person that afk farm (auto kill) can farm a lot longer than a person manually killing each enemy. I farm 2-3 hour 200p a day which is 6kp per month TEHEE XD. I CAN DO A LOT LONGER, THINK HOW MUCH I CAN MAKE.

**XAKU INFINITE AFK GOD BUILD : afk farm using xaku in survival mission ( can also level cap )**

[Player Sync](#)
[New Build](#)

- 2) FRAME MOD: Excess mod. (Discarded from build, since [\[Ceramic Dagger\]](#) are inheritor to exodia throne)  
Can swap [Holster Amp](#) and [Vigorous Swap](#) with any other mod you like. This mod is for [DEHTAT DEATH GOD TRUE EXODIA CONTAGION ONE SHOT ACOLYTE BUILD](#).  
Recommendation is [Corrosive Projection](#) and [Constitution](#).
- 3) HELMINTH: [Parasitic Armor](#) equal immortality.  
[Parasitic Armor](#) convert shield to armor. Think of [\[Mesa\]](#), the reason [\[Mesa\]](#) is OP is not because of automatic gunning the enemy, but it is her survivability using her 3rd skill to get 95% damage reduction. [Armor](#) also give damage reduction. With 139 str (199 str with [Molt Augmented](#)) and 5 [Blue Archon Shard](#) total up to 750 shield (1k ++ total shield with innate xaku shield), we can convert shield to 2k ++ armor (around 85-90% damage reduction). With [Shield Osprey Specter](#), we can further increasing shield soo the convert armor can reach near 3k armor (95% damage reduction maxed).
- 4) HELMINTH: No shield, are we in trouble?  
Nope, because we have 0 shield. What does ZERO SHIELD mean to you? It means shield gating. Though it actually reverse shield gating. From null to 0. When we turn off [Parasitic Armor](#), we wont have any shield, thus we will fall into shield gate state (immune for 2-3 sec). Without shield also enable us to use [Hunter Adrenaline](#) to replenish our energy easily. Enemy will easily damage our health. The more enemy damage us, the better we replenish energy. Trust me, arcane energize is not that good and not that bad.
- 5) FRAME MOD: Enemy damage health directly, we are doomed brother?  
Nope, remember we have 90% damage reduction. If that will not convince you, with [Vampiric Grasp](#) to replenish health and [Arcane Blessing](#) to increase maximum health, we can be XAKU-GOD. To replenish health, using [Vampiric Grasp](#) by turn on xaku 3rd skill gaze and/or 4th skill the vast untine (enemy affected by area), will enable us replenish health when xaku 2nd skill grasp of lohk attack enemy. But isnt 25 heal per attack is low? Definitely not. Xaku has 12-16 stolen gun by using 2nd skill grasp of [\[Lohk\]](#) (16 gun x 25 health per attack in mere second XD). By right now, u should already realized how OP xaku, also with 3rd skill gaze, the area armor strip sheeshhhh.

armor. If u have 2k ++ armor, your companion also will have 2k ++ armor. That mean your companion will also have 90% damage reduction. Same with [Link Health](#). Ever feel your [\[Smeeta Kavat\]](#) is useless? Dying again when farming material? This is the solution so your smeeta will be SMEETA GOD TOO XD. WTF EVEN IM TALKING HERE.

- 7) [\[Smeeta Kavat\]](#): Choosing bad lifesteal mod for smeeta, should be [Hunter Recovery](#) instead of [Primed Leader Pack](#). The only and only reason is because even with low lifesteal, you can still get lifesteal from any damage. Most veteran make this mistake as they want more lifesteal, but [\[Pack Leader\]](#) only give more lifesteal on melee damage only. Different with [Hunter Recovery](#), you can heal your warframe from companion damage (when moving or not using auto turret). [Link Health](#) used to have gimmick with [Hunter Recovery](#), where companion damage enemy, the damage heal your frame, and healing properties heal companion back with [Link Health](#). But now even if the gimmick cannot be use, [Link Health](#) can still heal your companion because of [\[Xaku\]](#) has healing properties from [Vampiric Grasp](#) and combine with damage reduction and health increase for smeeta. IT IS A TRUE MONSTER, THE SMEETA GOD. let me repeat the line. Ever feel your [\[Smeeta Kavat\]](#) is useless? Dying again when farming material? This is the solution so your smeeta will be SMEETA GOD TOO XD. WTF EVEN IM TALKING HERE.
- 8) HURAS KUBROW: AFK level capping (recommended by one of my in-game friend) (Not Tested Yet)  
It is similar to [SMEETA GOD BUILD](#) but with viral proc and invisibility as warframe utility. [Stalk](#) has the ability to make warframe and companion invisible if there is enemy around 24 meter. But to avoid invisible break, we can not attack using weapon and companion will also not attack. To make [HURAS GOD BUILD](#) attack enemy soo we can proc viral without using [Cedo Maxed Status Build](#), we can use scanner as it is stated in [Stalk](#) wiki, kubrow will attack scanned enemy. But wait a minute, kubrow status chance is very low. We need to use [Mecha Overdrive](#) to scale kubrow status chance with primary weapon status chance. Since [Cedo Maxed Status Build](#) has 250% status chance give & take, we can have kubrow with high status chance to proc viral easily.

Turret Skill. SMEETA GOD ehem..... Thats all i guess

- Hmm this is all you need to afk in survival mission (depend on your duration mod, 4th skill the vast untime for afk'ing around 38 sec which the lowest) ( my duration is 53 sec with 3 tauforged blue for shield and 2 tauforged red for duration)
