General

All Void Angels were once humanoid manifestations created from

[Conceptual Embodiment](#), similar to the [Holdfasts](#)^[2]. After giving in to the song from the Void, those who are reborn from the Void then evolve into a more abstract form. These masses of human-shaped Void energy can be found cocooned and asleep within the surrounding walls of the Zariman, and can be heard softly wailing and singing. When fully matured, these forms will then turn into a fully mobile, angel-like entity.

 Come to the invading  [Corpus](#) and

release their master.^[3] As a result, they cause numerous [Void Floods](#) to appear around the ship, increasing the risk of contamination.

When not asleep within the walls, the Void Angels will attempt to make their way to the Zariman's [Reliquary Drive](#) and attempt to feed off of it.

Behavior

In their initial state, angels will be fought in the same space as other enemies. They possess multiple attacks:

- A teleport during which they are invulnerable. They will target the area around a player and, after a short delay, slam into the ground, creating a shockwave. Their landing zone is telegraphed by faint red energy swirling in the selected area.
- A slowly charging orb, which absorbs incoming damage and will home in on a player once thrown. The orb can be destroyed by Operators, either in mid-air or while it is still charging. The latter causes the Angel to be staggered.
- A ground slam that sends out spikes in a line. If these spikes hit a Warframe, they will be impaled akin to  [Garuda's ⚡ Blood Altar](#), and the controlling player will be forced into Operator/Drifter mode. They will not be able to return into their Warframe until they destroy the spikes paralyzing it, or are knocked out in operator form.
- During its recovery phase, the Angel's physical form will continuously create spheres around it, which will fire a damaging  [Magnetic](#) beam at nearby targets after a short delay.

Warframes impaled by a Void Angel. Note the ashen texture while impaled.

After at least 1 health segment has been destroyed, they will gain a few more abilities:

- A surrounding  [Corrosive](#) fog that heals the Angel if it damages a Warframe, including non-Warframe Specters.
- A delayed explosion that blankets a large area in the same fog.

As an **Ethereal Void Angel** it will have a different set of attacks:

- A swipe, which will create damaging beams that fire outward in sequence.

With an Amp. enough it may teleport to the g a beam attack.

Like some special bosses, the Void Angel can only receive up to 4 stacks of any [Status Effect](#) with the exception of [Impact](#) which can stack up to 6 times.

Strategy

The Void Angel possesses 2 or 3 health bars (2 on Ravenous, 3 on awoken Dormant Void Angel). After depleting the first health bar, the Angel will enter a recovery state indicated by a green gauge filling.

While recovering, a portal in the form of a bubble appears above the Angel, which can be entered by touching the portal (a jump may be needed). The player will be automatically switched into Operator/Drifter mode and teleported into the Ethereal plane - a special realm consisting of a circular platform, encountering the **Ethereal Void Angel**. Falling off the platform or being defeated in the realm will forcibly eject the player from the realm. The Ethereal's health bar is indicated in blue.

After damaging the Ethereal form at least 50%, it will become invulnerable as multiple Dimensional Orbs float around it which can be removed with [Void Sling](#). The number of orbs scales with the number of players, at minimum two orbs in a solo mission. Removing the orb creates a golden shield when the Operator lands, blocking some of the Angel's attacks and granting [Heat](#) damage to [Amps](#).

If the Ethereal Void Angel is not defeated quickly enough it will initiate a beam attack. This ability is highly damaging and ignores [Void Mode](#), while its aggressive tracking makes it difficult to dodge. Any Operator outside of cover will likely be knocked out.

Once the Ethereal form is defeated, one of Angel's physical form's health bar is permanently removed and all players are ejected from the Ethereal plane. If the Ethereal form is not defeated before the green recovery gauge reaches the end, all players are ejected from the Ethereal plane and the contested portion of the Angel's physical form's health bar is completely restored.

The process repeats until all 2 or 3 physical health bars are depleted. On the last physical health bar, the Angel's physical form will die without attempting to recover or to offer an Ethereal encounter, thus requiring 2 Ethereal encounters for the awoken Dormant Void Angel, and just 1 encounter for the Ravenous Void Angel.

ave no effect on Void Angels.

WARFRAME Wiki

Tips

- During [Bounties](#), hunting a dormant Void Angel that is not required by the bounty is **not** advised until after the bounty is completed, as ignoring the objective may cause mission failure (depending on the bounty conditions) and thus lose out on the Void Angel's drops.
- While the physical form can be easily overcome by multiple possible Warframe builds and weapons, the Ethereal form on the other hand is both limited to the Operator and has a time limit, which may require a decently built Operator especially on higher tier bounties. [Madurai](#) has many Operator-enhancing abilities related to damage output, none of which are Way-Bound.
 - Madurai disciples also have [Contamination Wave](#) at their disposal, further rendering the Angels vulnerable to Operator/Drifter damage.
- [Caustic Strike](#) from the [Unairu](#) school affects Void Angels by permanently stripping off their armor, further making them vulnerable for a quick dispatch.
 - Additionally, the spawned [Unairu Wisps](#) after using Caustic Strike will further amp up the Operator's/Drifter's damage.
- Bursting the Ethereal form with enough damage output can skip its orb protection phase entirely. Timing a burst of damage when it is only slightly above 50% health and right when it starts an attack can be an effective method of skipping the orbs.
 - [Temporal Drag](#) from the [Zenurik](#) school slows down both the physical and ethereal Angel forms, giving time for bursting to skip the orb phase. Upgrading it to [Temporal Shot](#) further amplifies Operator damage by landing headshots on the Angel.
 - [Magus Melt](#) provides innate [Heat](#) damage to Amps after Void Slinging, without needing the golden shield buff.
- [Eternal Eradicate](#) is available for purchase from [Cavalero](#) and can be a handy boost to Amp effectiveness.
- The damage bonus from the Orb shields do **not** stack with one another. If fighting an Ethereal Angel as a group it would be wise to spread the shields out so that Operators/Drifters can attack the Angel from multiple angles.
- The Angel cannot teleport to areas that are too small for it to occupy.
- Equipping [Venari](#) with [Sharpened Claws](#) will expose flesh on both varieties of void angel when she attacks them.

		Other Drops:
		Voidplume Quill

- Compared to their dormant counterparts, Ravenous Void Angels have one less health bar and only spawn in [Void Armageddon](#) missions after three Exodampers have been defeated. Once they reach level 10, they will drop a [Voidplume Quill](#) on death, balanced out by their increased damage and health regeneration during Void Armageddon missions.

Trivia

- Teshin's dialogue in [The Circuit Void Flood](#) implies that Void Angels are servants of [The Man in the Wall](#), seeking to break their master out of the Void.

Bugs

- Sometimes a Void Angel receives damage beyond one of its three segmented bars before switching to invulnerability phase and players are unable to enter the Void bubble, rendering it unkillable for the rest of the mission.
- When a Void Angel successfully impales a Warframe and forces the player into Operator/Drifter mode, the player at times cannot return to their Warframe even if the impaling spikes were already shattered.
 - When the Operator/Drifter gets knocked out while this bug is in effect, they will simply respawn beside their Warframe.

Patch History

[Hotfix 36.0.1](#) (2024-06-19)

- Fixed players being indefinitely stuck in the Void Angel's spike ability.

[Hotfix 35.5.11](#) (2024-05-07)

- Fixed getting pulled out of the Void Angel's Ethereal Plane as Protea in Zariman missions if Temporal Anchor is cast before entering it.

[Hotfix 35.5.4](#) (2024-04-05)
