[New Build](#)

Hastened Deflection(+Shield Recharge) for better shield-gating invulnerability.

Shield-gating grants invulnerability when shield is broken. The duration of invulnerability scales from 0.3 to 1 second depending on how much shield was left when it was broken.

[Tek Enhance] provides longer [Charm] buffs.

[Synth Fiber] adds some nice passive reload of weapons, and lets you pick up health orbs at max health, which has some synergies with [Health Conversion](#) and [Equilibrium](#).

Check out my other builds on [my profile](#). Especially the "Generic" build series, which show the optimal builds for 90+% of weapons of that type.
