Acquisition

Vasca Kavats are not generated randomly from the Orbiter's Incubator. Instead, the player must have their owned [Kavat](#) become infected by [wild Vasca](#) that appear at a certain time in the [Plains of Eidolon](#). The wild Vasca can also be lured out via [Conservation](#)

3000 and Vasca Kavats are attacked by the wild Vasca, it

The player must then take their infected Kavat back to the Orbiter's Incubator and use a [Genetic Code Template](#) on them. To ensure that it will be specifically a Vasca Imprint, rather than an imprint of the original Kavat's breed, the wording of the confirmation dialog should read **"Creating a pet imprint will consume a blank imprint and cure your Kavat of the Vasca Virus. Continue?"** Selecting YES will start the imprinting process, which will yield a Vasca Imprint while also removing the virus. As this is creating an imprint, available imprints of the Kavat are required and also used up.

Two Vasca Imprints are needed as accessory to the ten additional [Kavat Genetic Codes](#) and one [Incubator Power Core](#) to create a Vasca Kavat.

Note that the infection will be removed as the imprint is created; as such, the infection process needs to be repeated to get the required 2 imprints. This process can be streamlined by having two Kavats and infecting them both before creating the imprints, bypassing the wait for the first imprint creation before obtaining the second infection.

An Infected Kavat

To remove the infection without using a Genetic Code Template, the player must have a [Vasca Curative](#), sold by Master Teasonai for  **500**. It is a gear item which must be equipped and used in a mission.

Alternatively, the [Vasca Kavat Starter Kit](#) can be bought from the [Market](#) for  **105**. This bundle includes two Vasca Imprints, the 10 Kavat Genetic Codes, Incubator Power Core, and an extra Genetic Code Template.
