Sk

The Parallax was designed for [Zariman](#) interplanetary research. It can deploy the advanced Orokin Eye air support, which would have allowed colonizers to study areas rich in rare resources before landing.

—In-game description

The **Parallax** is a [Landing Craft](#), which can serve as an alternative transportation choice to the [Liset](#). It comes with the *Orokin Eye* air support ability, scanning for nearby rare resources.

Acquisition

A fully built Parallax can be purchased on the [Market](#) for  **150**. Alternatively all component blueprints can be obtained from [Zariman Ten Zero](#) Reinforced Carrypod [Storage Containers](#) as a rare drop, **while the main blueprint can be purchased from the Market**. All component blueprints are [tradeable](#) between players.

Item	Source	Chance	Expected	Nearly Guaranteed
 Engines Blueprint	Reinforced Carrypod	0.67%	~ 150 Opens	1032 ± 344 Opens
 Fuselage Blueprint	Reinforced Carrypod	0.67%	~ 150 Opens	1032 ± 344 Opens
 Avionics Blueprint	Reinforced Carrypod	0.67%	~ 150 Opens	1032 ± 344 Opens

All drop rates data is obtained from [DE's official drop tables \(https://warframe.com/droptables\)](#). See [Mission Rewards#Standard Missions](#) for definitions on reward table rotations.
For more detailed definitions and information, visit [here](#). Building the Parallax requires the [Landing Craft Foundry Segment](#).

Manufacturing Requirements					
					Time:
25,000	1	1	1	1	72 hrs

					Rush:  50
Market Price:  150			Blueprint Price:  70,000		
 Avionics

 Fuselage					
 15,000	 11,000	 30	 5,000	 4	Time: 12 hrs Rush:  25

Orokin Eye

Ordis scans the area for rare items.

—In-game description

The **Orokin Eye** [Air Support](#) ability will highlight these items within a **150** meter radius:

- [Ayatan Treasures](#)
- [Syndicate Medallions](#)
- The following [Fragments](#), which will only be highlighted if there is a player in the

- [Somachord](#) fragments
 - [Frame Fighter](#) fragments
 - [Cephalon](#) fragments
-
- [Kuria](#)
 - [Zarium Accolades](#)
 - [Vocas](#)
 - Rare [Storage Containers](#)
 - [Sentient Cores](#)
 - [Orokin Defixio](#)
 - [Orokin Vault](#)

Orokin Eye **does not** highlight [Resource Caches](#).

Notes

- This is somewhat similar to [Golden Instinct](#) in sending out visual Void Sparks to each detected item, but is much more useful in actually highlighting each detected item for every member of the squad, which Golden Instinct does not do.
- Although visuals of Void Sparks will only last **5** seconds, detected items will remain highlighted until all players interact with them.
- The detection radius is measured by an imaginary straight line ignoring any walls and other obstacles from the player that activated this ability and to each detected item. In other words, detection radius does *not* take into account the foot path to reach each item given the actual layout that was used to procedurally generate the level map. Thus it is entirely possible for Orokin Eye to detect an item within a straight line of its 150m detection range from the player, but the activating player would need to traverse the entire map to actually reach the item.

Skins

Parallax Skins can be applied through the **Equipment > Orbiter > Landing Craft > Livery** option. These skins do not consume decoration capacity.

Media

Patch History

[Update 35.1](#) (2024-02-20)

- Fixed Orokin Eye not consuming Air Support Charges.

[Update 34.0](#) (2023-10-18)

- Orokin Vaults on Deimos can now be highlighted by the Orokin Eye Air Support ability.

[Hotfix 31.6.4](#) (2022-07-14)
