Notes

- The amount of Energy gained from damage taken to health is affected by Warframe [Armor](#).
- Stacks with [Hunter Adrenaline](#) for a total of 85% damage conversion.
- Applies to [Status Effects](#) that deal damage over time and damage that bypasses shields.
- Damage taken to [Overguard](#) only applies energy if the user does not have [Shields](#) ([Inaros](#) and [Nidus](#)).
 - The Overguard must also come from an ally. As such, [Kullervo's Recompense](#) does not receive this benefit despite his lack of shields.
- Does **not** apply to the following sources of damage:

Join the Quest! Share Your Views on Upcoming Games!

[Despoil](#), or

and [Orokin Derelicts](#).

- Health lost due to the *Vampire Nightmare Mode* modifier, or health drained in **Survival** missions by falling to 0% life support.

Tips

- Rage gains more mileage when equipped to Warframes with high **Health** such as [Ash](#), [Grendel](#), [Inaros](#), [Mesa](#), [Saryn](#), [Nidus](#), or [Valkyr](#).
 - In particular, [Inaros](#) and [Nidus](#) benefit greatly from Rage due to their lack of shields and significantly high health.
- Damage reduction from things like **armor** have mixed value with Rage, since it allows you take survive more damage, but reduces energy gained as well. Damage reduction which applies to shields, such as [Adaptation](#) and various warframe abilities, are particularly bad due to them making it harder to lose health at all.
 - This means that frames with low **health** and high damage reduction and/or shields are usually a poor choice for Rage.
- Rage can be used alongside healing effects to create a renewable source of energy.
 - Examples of healing include [Life Strike](#) for melee weapons, melee weapons such as [Hirudo](#), [Valkyr's Hysteria](#) ability, and the healing abilities of [Trinity](#) and [Oberon](#).
 - Note that Trinity already possesses a **primary means** of generating energy.
 - Many Warframe ability **Augments** (such as Saryn's [Regenerative Molt](#)) create healing effects which can be employed in the same fashion.
 - Beware of high amounts of burst damage which may overwhelm a Warframe before they can heal themselves.
- If the player has [Quick Thinking](#) equipped and suffers lethal damage, the gain in energy will be converted back over as emergency health.
- When hunting for vaults in the **Orokin Derelict**, or even outside of the derelict, equipping the **Decaying Dragon Key** handicap to sacrifice shields will reduce the time needed before Rage can take effect.
- Rage converts 5% less energy than [Hunter Adrenaline](#), but costs 2 less Capacity at max rank. This makes Rage preferable in builds that are tight on

Patch History

[Hotfix 35.5.6](#) (2024-04-10)

Updated Overguard Interactions With Rage

As announced last week, we've changed how Overguard interacts with effects that benefit from receiving damage on Warframe to make it more co-op friendly. Specifically, the Rage Mod. The conversations regarding Dante's abilities with Overguard became a driving factor to look at these interactions and find ways in which we can make them work to benefit co-op play. Overall, these changes aim to create a harmonious arrangement between the often unpredictable Overguard
