- At all ranks, it will take **40** ⚡ [Electricity](#) procs to reach the maximum bonus.
- Stacking Conjunction Voltage does **not** require the Electricity proc to come from the secondary: it can come from Warframe abilities such as [Volt's](#) or [Gyre's](#) ability kit, or *any* weapon that can proc Electricity - even if the secondary is holstered.
- Unlike other weapon arcanes, Conjunction Voltage stacks expire all at once after 12 seconds of no procs, rather than only 1 stack every 12 seconds.

Tips

- With high [fire rate](#) weapons such as [Ambassador](#), [Amprex](#), or [Quatz](#), Conjunction Voltage's max stack can be reached rather quickly despite its tendency to lose all its stacks upon expiry.
