Buff & Debuff

[EDIT](#)

Buffs and Debuffs are effects that can positively or negatively affect a target during a mission. Some buffs and debuffs may present an icon right next to the player's health and shields. In-game, blue icons denote buffs and red icons denote debuffs.

Active buffs and debuffs can be viewed in the pause menu.

Elemental Damage Bonus Increases the damage of weapons and certain abilities. This bonus is multiplicative after damage mods such as [Serration](#), but before elemental mods such as [Hellfire](#) (i.e. stacks additively with elemental mods). The element bonus can combine with elements already present on the weapon (e.g. using [Fireball Frenzy](#) on a [Cold](#) weapon makes it deal [Blast](#)) or increase the elemental component of a secondary element if that is not innate (e.g. using [Shock Trooper](#) on a weapon modded with [Radiation](#) increases the [Electricity](#) component on the weapon, if [Radiation](#) is innate, [Electricity](#) is added following the above rules).

Some elemental damage bonuses can be applied to [Companions](#), [Specters](#), [Mind Controlled](#) enemies, [Shadows](#), [Saryn's Molt](#), [Loki's Decoy](#), [Invasion allies](#) and clones created from [Blade Storm](#). Bonuses cannot be applied to allies suffering from a [Radiation](#) proc.

Elemental damage bonuses are granted by:

Caster and allies

- [Grendel's Nourish](#) (Nourished Strike buff), adds [Toxin](#)
- [Energy Field](#), adds [Heat](#) (bonus can be applied if allies shoot through shield)
- [Fireball Frenzy](#), adds [Heat](#)
- [Freeze Force](#), adds [Cold](#)
- [Shock Trooper](#), adds [Electricity](#)
- [Smite Infusion](#), adds [Radiation](#)
- [Venom Dose](#), adds [Corrosive](#)

Caster only

- [Wukong's](#) passive (Primal Forces buff)
- [Ack & Brunt's](#) passive, adds the type of damage blocked to boost next attack

- Lesion's passive, adds bonus Toxin to its attacks
- Magus Melt, adds Heat (Operator amp only)

Players under this effect will have their weapons inflict an extra hit per damage instance that is based on the percentage of total weapon damage. This extra hit is counted as a separate damage instance and will not affect the initial damage distribution nor will it affect proc type chance calculations.

Extra Hit Player

- Saryn's Toxic Lash, adds an extra hit of Toxin damage
- Xaku's Xata's Whisper, adds an extra hit of Void damage

Faction Player Players gain **multiplicative** damage bonus against a particular faction when equipped with the mods below in order of primary rifle, primary shotgun, secondary, and melee. This damage bonus stacks on top of base damage and any elemental mods added on a weapon.

Buffs and Debuffs in Pause Menu

The meme of players giving their squadmates enough buff indicators to look like an MMORPG screen is real and valid. Worry not! We have not changed the buffs you get, we're simply adding the ability to see what the actual Buff and Debuff Icons mean when entering your Pause Menu:

As you can see in the screenshot above, hovering over the icon will show you the
