Umbral Lavos – Ubertank, Elemental Master

Hello there!

First thing first, this build is created by my clanmate **ArcticTFoxy** and modified a bit by me. I choose more **Range** over **Duration**, that's main difference between ours builds.

The **playstyle** is kinda **intensive** so I hope you are ready. As far as **[Lavos]** is already **tanky**, we need to make him an ubertank, right? So here's **Umbral Forma** and **all Umbral mods**. But we need more! **[Adaptation]**! MORE! OK OK... **Arcane Grace** and **Arcane [Guardian]**! Now we're talking! **Ubertank**! And when shit hit the fan, we got **[Lavos]** first skill, Toxin  **Ophidian [Bite]**! This one will heal us for almost 31%! That's nice!

OK, now all the **[Juice]**! Gameplay!

Hold to imbue! Make **Corrosive**  +  **Vial [Rush]** and **Viral**  +  **Transmutation Probe** (or opposite) and probably would be the best if you make **Gas**  +  **Catalyze** just to make your life easier! Any enemy will melt, doesn't matter level, Status proc. will do the trick, and of course help yourself with guns and melees for MVP.

Here's the tip of how to build **Combined Elements**:

■ Combine with a different element to produce a Secondary Elemental damage type:  **Blast** (2 + 4),  **Corrosive** (1 + 3),  **Gas** (1 + 4),  **Magnetic** (2 + 3),  **Radiation** (3 + 4), and  **Viral** (1 + 2).
 ■ Inputs can be in any order, or the hotkeys can be held down together to instantly produce a Secondary Elemental damage type.

I suggest you use companion with **Synth Fiber** on it... like this Moa - **My name is Legion, for we are many.**

Try not to break your keyboard ... or your fingers :)

Enjoy!
