Notes

[\[Expand\]](#)

- The 90 day variants of [Affinity Booster](#) and [Credit Booster](#) are exclusive to the highest tier Prime Access and Prime Accessories packs. The in-game Market only offers 3, 7 or 30 day boosters available for purchase.
- As of [Update 11.5](#) (2013-12-19), all Prime Access owners (as well as [Founders](#)) obtain +1 to their deployable [resource drone](#) limit.
- [Frost Prime](#) and [Mag Prime](#) were not released as Prime Access packages. Frost Prime's parts were farmable from the Void with his blueprint being rewarded from the [Fusion Moa Event](#), and Mag Prime was released as farmable in the Void with [Update 10.0](#) (2013-09-13). Due to this being their original release methods, they were the first and second, and only, Prime Warframes with no option to initially purchase them outright.
- As of Chroma Prime Access, many of the prices listed have been converted to various *local* currencies, allowing players who live in other countries see them as a viable and *reasonable* prices, without having to convert them from USD. The currency that is seen depends on the country where the player lives.
 - The prices for any digital purchases (e.g. [Platinum](#), Exclusive Bundles) are also converted as well.

Trivia

- Prime Accesses before [Nekros Prime](#) did not have contiguous start and end dates, leaving around a one week gap between new Prime Accesses.

- Prime Accesses subsequent to [Gauss Prime](#) no longer uses [ability](#) names as its package names.
