# Shedu

203 EDIT

SENTIENT WEAPONS

## CODEX

This arm-cannon, ripped from a Sentient, rapid-fires thermal pulses that explode in an electrical blast. Features an ammo-less quick charge capacitor, that emits a knock-back pulse and strips Sentient damage resistances when fully discharged.

The **Shedu** is a [Sentient Assault Rifle Arm-Cannon](#) that fires [Heat](#) beams that create [Electricity](#) explosions on impact. When expending the battery, it releases a large pulse, staggering enemies with an [Impact](#) proc and removing Sentient damage resistances. The arm-cannon does not have ammo reserves, and instead regenerates ammo.

## Characteristics

- This weapon deals  **Heat** damage, and the explosion deals  **Electricity** damage.
- Shots explode in a **6.6** meter radius upon impacting a surface or enemy.
  - Initial hit and explosion apply status separately.
  - Explosion does not need direct line of sight to deal damage and will penetrate walls.
  - Can benefit from  **Cautious Shot**.
- Fully depleting the battery produces a **20** meter pulse that causes 100 **Impact** damage with 100% status and removes **Sentient** and **Shadow Stalker** damage resistances.
  - This is affected by base damage, faction damage, and **Firestorm** / **Primed Firestorm**; but not by elemental or **multishot**

## Acquisition

The weapon blueprint is given to the player at the end of the [Erra](#) quest. Additional blueprints can be bought from [Cephalon Simaris](#) for **100,000**.

The Shedu's components are rare drops from [Symbilysts](#) found in [Sentient Anomalies](#) that appear in the [Veil Proxima](#) during [Empyrean](#) missions. The ship occupies one random node for 30 minutes, indicated by a red flashing [Sentient](#) symbol, then rotates to a different node. Symbilysts were also found in [Operation: Scarlet Spear](#) and [Operation: Orphix Venom](#). The parts can be [traded](#) between players.

Symbilysts also spawn in [Archon Hunts](#) in higher numbers per mission, especially in Defense and Interception missions.

## Notes

- The Shedu uses rifle mods.
- Has a **1** second delay before ammo begins to regenerate; if there are still rounds left, the delay is **0.4** seconds instead. Ammo regenerates at **3.5** rounds per second; it takes **2** seconds to regenerate a fully depleted battery excluding the delay.

## Known Bugs

- [Galvanized Aptitude](#) is multiplicative to base damage sources on direct hits.

## Tips

- The Shedu's particle effects can make it very difficult to aim. To offset this, players may either change the Shedu's energy color to black or reduce particle density altogether via the Options menu.
- As the [Heat](#) and [Electricity](#) damage portions are separate from one another, the Shedu can get a combination of [Gas](#) and [Corrosive](#) with only a

- The Impact status on battery depletion is not technically "forced" and is probably based on 100% status chance. So status bonuses can increase the number of Impact procs, and a negative status chance riven can make it non-guaranteed.

## Trivia

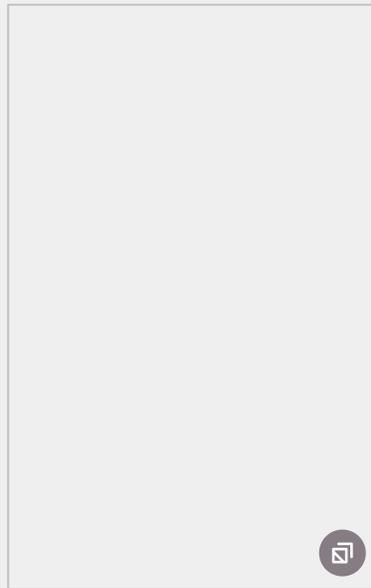

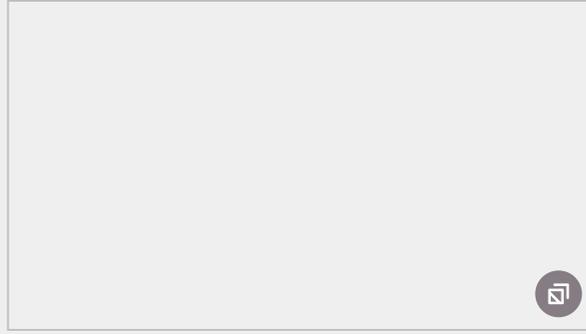

---

- *Shedu* is an Assyrian guardian deity. The term also means *demon* or *insanity* in several other languages.
- After the [Miter](#) and [Spectra Vandal](#), the Shedu is the third weapon to use a Chassis as a component.
- Due to the way the Shedu is attached to the Warframe model, certain visual effects on the Warframe will also cover the Shedu. These include [Iron Skin](#), [Parasitic Link](#), the [Bloodshed Sigil](#), and certain [Ephemeras](#).
- As an Arm-Cannon, the Shedu will always appear invisible when holstered.
- Despite being of [Sentient](#) design, the weapon does not actually deal any [Tau](#) damage.
