Does amp also buff operator amp?

If my str is 40% and the amp says 0.1-0.8x dmg multiplier would that just make my attacks weaker?

[A Fandom user](#) • 9/30/2023

Yes your attacks are weaker. i mean you don't need to be good at math to figure that out.

If it is 2x you are doing twice the damage, if it is .5x you are doing half the

Fandom is on a quest for your opinion

NO, your attacks are **NOT** getting weaker.

Yes, your attacks are getting **STRONGER**, just not by much. they are just not being buffed as much at that str lvl

So at minimum buff of .1 or 10% more dmg. So easy numbers base dmg 100

$100 + 10\%$ or 100×1.10 both = 110 dmg

Is this still accurate?

Does not actually increase the damage of [Mallet](#).

MORGION • 6/28/2023

It isn't and possibly never was.

A Fandom user • 6/29/2023

That's weird tested this and it does not double the damage unless I'm doing something wrong here.

What's the max % the AMP can go to?

Fandom is on a quest for your opinion

I have not achieved maximum potential but with 317% ability strength it increases base weapon damage from 79% to 634%. With mallet it stays at max percentage

Ur guys sure that this skill is additive? My chroma with ~900% scorn do 30 million glaive dmg, one day i got a octavia with exact 300% amp buff, and i was doing 90 million glaive hits. If it was additive the dmg shud be way less.

It is additive.

A Fandom user • 7/3/2023

It's multiplicative.

A Fandom user • 8/25/2023

It's addiplicative.

What happens when there are multiple amps overlapping on the field?

A Fandom user • 5/31/2021

Only the strongest one is used, similar to Rhino's Roar.

They both work

Operators can't benefit from warframe buffs, so nope.

A Fandom user • 7/8/2022

Operators benefit from not warframe buffs, but things like volts shields do affect operator amps by shooting through the shield.

[TheLavalampe](#) • 1/10/2018

It works weird the actual buff you get from amp is
$$\text{Amp buff} / (\text{Sum of serration like mods} + 1)$$

this is the additional damage you get from amp and if you want the damage multiplier you add 1

This should be changed to something like "Amp (ability)" and Operator Amp should be changed to Amp. Honestly, how many people will be looking for just this particular ability instead of an entire modular weapon system?

length

No, it does not. The only abilities than can be buffed by weapon damage (octavias amp, mirage augment etc.) are ones with IPS stats. Any ability that does not use IPS stats is not affected by this (Banshee 4, Saryn 4 etc) which is why the only frames used for buffering are ones which increase pwr strength such as rhino or equinox.

Cebian i • 1/18/2018

^Rhino does not buff ability strength, rhino's buff is unique in the fact that it buffs **damage done** by **Both** weapons and warframe abilities

A Fandom user • 7/31/2017

It seems like the sound from Octavia's abilities don't actually affect the multiplier at all, just the sound of the ability being cast. If you cast Amp, then an ability and just stand still, eventually it will go down to the minimum multiplier even though you have an ability producing constant sound.

A Fandom user • 6/12/2017

Amp's bonus will not work properly (gives minimum bonus, as if there were no sound) if the in-game Master Volume is set to 0. It will work for 1-100.

is Multiplication, slash Dot damage would multiply with Amp buff's percentage, like the Chroma's Fury buff, but it does not.

stronger in terms of it buffing weapon dmg ... yes
stronger in terms of buffing warframe abilities ... no

(Edited by FANDOMbot)

[UNeaK1502](#) • 9/9/2017

to the first answer, Those frames arent better buffs than rhino.
With Roar you buff the damage output, which involves all kinds of damage (weapons AND abilities). Whereas the Augment for said frames only buff certain abilities and weapon.
E.g. Equinox's maim cant be buffed by said frames, but by roar.
Just wanted to correct this :)
