CODEX

Strike up a symphony of destruction with the mistress of music, Octavia, in her grandest and most spectacular form. Featuring altered mod polarities for greater customization.

When ape pounded flint on flint, some watched the sparks. Others merely danced. Our haunted creations will need drumbeats to drown out the throb of [Helminth](#) blood.

Songs to harmonize the long scream. Anthems to elevate their butchery.

But they are owed their struggle, as we are owed entertainment.

Our grand finale. Octavia.

—Ballas

Release Date: February 23rd, 2021

Octavia Prime is the [Primed](#) variant of [Octavia](#), possessing higher [Shields](#) and [Energy](#), and an additional polarity. Octavia Prime was released alongside [Tenora Prime](#) and [Pandero Prime](#).

Notes

- Octavia Prime, compared to **[Octavia](#)**:
 - Higher [Shields](#) (270/370 vs. 180/280)
 - Higher [Energy](#) (215/265 vs. 175/225)
 - Additional [Polarity](#) (vs.).

- If Octavia Prime wields her [Signature Weapons](#):
 - [Tenora](#)/[Tenora Prime](#): [Headshot](#) kills with [Alternate Fire](#) have a **20%** chance to instantly refill the magazine.
 - [Pandero](#)/[Pandero Prime](#): Headshot kills with Alternate Fire increase [reload speed](#) by **20%**.
 - No weak spots other than actual heads will trigger these effects.
 - Headshots on invulnerable enemies will still grant these effects, but **not** with invulnerable bosses.
- As with any other [Prime](#) Warframe, moving close to the location of an [Orokin Void Death Orb](#) will restore a pulse of 250 [Energy](#) to nearby allies, even if that Death Orb is inactive, destroyed, or non-present. This effect can only occur once per orb.
- Upon acquiring Octavia Prime, the player will receive [Bombast Instruments](#) for her [Mandachord](#).
- Octavia Prime's [Resonator](#) takes the form of a hi-tech bass drum that rolls along like a car tire, rather than a standard [Roller](#).

Trivia

- Octavia Prime is the third Primed Warframe to have [Signature Weapons](#), after [Atlas Prime](#) and [Banshee Prime](#).
- Octavia Prime is the seventh [Primed](#) Warframe whose non-primed variant was unlockable through a quest ([Octavia's Anthem](#)), after [Inaros](#), [Titania](#), [Atlas](#), [Mirage](#), [Limbo](#) and [Chroma](#).
- Octavia Prime's Mandachords on both arms are elongated, unlike those of her non-Primed counterpart, which are perfect semicircles. This does not affect the Mandachord screen in the Arsenal.
- Octavia Prime has Prime Details, which are jiggling pieces of cloth on her rear. However, they cannot be toggled off when changing her Skin to the Octavia skin.
- In the Prime trailer, Octavia Prime's helmet & Mandachord Energy flashes in sync with her Resonator. This seems to be for a cinematic purpose only as it is not the case in the game.

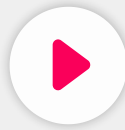

Bugs

- The Helminth cyst is not visible on Octavia Prime, regardless of how big or how small it is.
 - This bug also happened with [Equinox Prime](#) and with [Sevagoth](#).
