Lore

Caliban's Power is Now Yours

[PLAYER NAME],

The Warframe Caliban was created for one purpose: to destroy you.

He is an aberrant amalgamation of Warframe and Sentient. I fear his true

How relieved I am that his creator no longer controls him.

Today, I give you the chance to bring balance to this beast. I place Caliban in your domain.

Master his abilities. Discover his potential. Restore his honor.

Lotus

Birthered during [The Old War](#) by the [Sentient](#) warlord, [Erra](#), Caliban was created for a single purpose: to destroy the [Tenno](#).

A freakish amalgamation of both Warframe and Sentient, it is a miracle that his creator no longer controls him.

Notes

- When Caliban wields his [Signature](#) [Venato](#), each Melee hit has a **50%** chance to gain additional [Melee Combo](#) points.
- Caliban's ability kit is able to inflict [Tau](#) damage, which is neutral to all health types meaning its damage is neither increased or decreased against all enemies. His abilities are also able to trigger the Status Vulnerability [Status Effect](#).

Trivia

- Caliban is the 48th unique [Warframe](#) to be released, and is the second [Sentient](#)-themed Warframe after [Revenant](#).
- Caliban was first revealed in [TennoCon 2021](#)'s Art of Warframe digital panel. The panel featured his concept artist, Keith Thompson, who designed much of the [Sentient](#) faction's aesthetic.
- [Caliban](#) is a character from Shakespeare's play *The Tempest*, which depicts him as half human and half monster.
- Caliban is second in line of Sentient-themed Warframes, after [Revenant](#) who is predominantly based on the [Eidolon](#), a subspecies of undead spectral Sentients.
 - Similar to Revenant's Eidolon energy, Caliban exudes the signature Sentient unlight within his core cavity and the various exhaust vents on his body.
 - Caliban sports animated parts on his body ranging from the antennae spikes to the hovering shoulder blade pads.
 - Much like the Sentient drones and fragments, Caliban's body is bisected in

- Caliban's abilities are derived from some attacks used by Sentient enemies:
 - [Razor Gyre](#)'s spinning from [Conculysts](#).
 - [Sentient Wrath](#)'s shockwave from [Eidolons](#).
 - [Lethal Progeny](#)'s Sentient summon from Eidolons, [Oculysts](#), and [Summulysts](#).
 - [Fusion Strike](#)'s beam convergence from [Ropalolyst](#).
- Following his rework on [Update 37.0](#) (2024-10-02), Caliban is the first Warframe to possess abilities that inflict [Tau](#) damage.
- Caliban shares his name with a mission node on [Uranus](#).
- Caliban is third Warframe after [Titania](#) and [Wisp](#) and the first male Warframe with hovering [Idle Animations](#). However, he does not have unique movement animations.
- Oddly enough, despite Caliban's Sentient composition that would make him highly susceptible to [Void](#) damage, he and [Revenant](#) do fine in areas rife with Void Energy such as the [Orokin Void](#) and the [Zariman Ten Zero](#).
- Caliban is currently the last Warframe to have a dedicated profile video, as subsequent releases ([Gyre](#), [Styanax](#), and so on) lacked such.
