Characteristics

- This weapon deals primarily  **Radiation** damage.
- Damage ramps up from 20% to 100% over 0.6 seconds when firing. After firing stops for 0.8 seconds, the damage decays back to 20% over 2 seconds.
- Kills with this weapon releases an energy tendrill that can home-in on enemies close to the targeting reticle, up to a maximum of **4** tendrils.
 - Tendrils lock on to enemies within **40** degrees of the reticle. Tendrils will stay locked on until enemies are **60** or more degrees away from the reticle.
 - Tendrils disappear upon **reloading** or emptying the magazine.
- Can equip the Ocucor-exclusive  **Sentient Surge** mod.

Advantages over other Secondary weapons (excluding modular weapons):

- Pinpoint **accuracy**.
 -  **Magnum Force**'s accuracy penalty is minimal on this weapon.
- Normal Attack (wiki attack index 1)

Notes

- Tendrils are generated by killing an enemy with direct damage of the primary beam, or through status effects dealing damage (e.g. [Heat's](#) burning effect). Status kills will generate a tendril regardless of if they originated from the primary beam or a tendril. Direct kills with tendrils will **not** generate an additional tendril.
- Tendril *base* damage is the same as the primary beam. Tendrils can score critical hits and status effects independent of the primary beam.
- Tendrils homing in on the main beam's target are only cosmetic, and don't deal any additional damage or status effects.
- Tendril range is affected by [Ruinous Extension](#).
- Tendrils reset if the reloading process is started or the magazine reaches zero. Even if reloading is cancelled or the weapon is holstered, the tendrils will still vanish.

Tips

- Magazine refill effects such as reloading upon [holster](#) (from the [Synth Mod Set](#) or [Eject Magazine](#)), [Blood Forge](#), or kills with [Sentient Surge](#) or the [Ack & Brunt Incarnon Genesis's](#) Rogue Readiness perk will prevent the tendrils from disappearing.
- Tendrils aim for the torso, and as such cannot trigger [Arcane Pistoleer](#). However, it can still be triggered from the main beam, massively increasing the Ocucor's ammo efficiency and time between reloads.

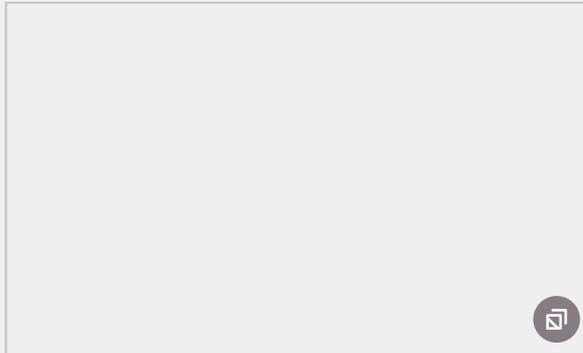

Trivia

- The Sentient component of this weapon appears to be a modified [Shwaak Prism](#), particularly with the "arm" that connects the Prism to a given [Amp](#) removed. The energy tendrils themselves however are more similar to the [Klebrik Scaffold](#).
- Though Ocucor is a secondary firearm, there is a ring that looks similar to [Jai Link](#) attached to it. This aesthetic is shared with [Battacor](#) and [Kreska](#).
 - According to [Lucas Hug's concept art](#) however, the rings are merely [carabiners](#) meant for easy transport.

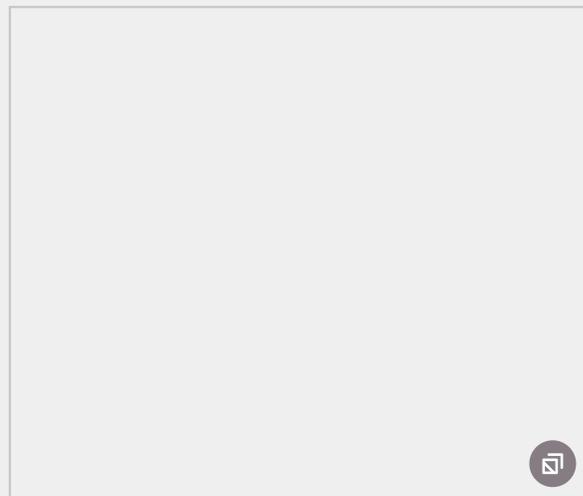

- The Ocucor's name, like the Battacor, seems to be a portmanteau, incorporating [Oculyst](#) (a Sentient enemy) and the suffix *-cor*, seen in some other Corpus weapons.
