ARCA TITRON BUILDS

BUILDS BY NINJASE

Mjolnir | Hybrid x12 Heavy Electric Slam Influence

How to use:

Swing Neutral Combo light attack (has highest multiplier) to get kills, build combo to x12 and activate Tennokai. Getting kills will build slam capacitor stacks (up to 5).

Once at x12 combo and 5 slam capacitor stacks, when Tennokai procs every 4 hits, immediately jump and heavy attack to perform a heavy slam. This will discharge all slam capacitor stacks while dealing 1250% more damage on the slam (12.5x multiplier) as well as forcing an electric proc that is spread due to melee influence, via every enemy hit in a 10m radius.

MOD BREAKDOWN

- Primed Pressure Point: mandatory +dmg. do NOT use Condition Overload because this does not apply to the radial slam AOE.
- [Blood Rush]: mandatory CC 440% at x12 combo, affects both light and heavy attacks equally. Sacrificial steel only applies max bonus to heavy attacks but you still need dmg for light attacks to gain slam capacitor stacks.
- [Weeping Wounds]: mandatory SC 440% at x12 combo, increases SC to 205%, allows you to proc electricity status more often per hit and multiple per slam which subsequently get spread via melee influence.
- Organ Shatter: mandatory CD mod
- Berserker fury: attack speed. Alternatives include quickening and Primed Fury.
- Shocking Touch: mandatory electric mod. boosts electric DoT by 1.9x and allows electric to proc on light attacks too.
