2/4

Cube of Deth | Health/Energy Orb Generation

Weapon Option 1: Electric/Gas Helstrum - this applies damage to the most possible enemies per shot to proc both [Energy Generator] and [Synth Deconstruct]. If using [Helstrum], drop [Duplex Bond] for a flexible option (listed below) as Helstrum does not deal sufficient damage to warrant this.

Electric Gas primer helstrum:

<https://overframe.gg/build/547232/>

Viral helstrum is an alternative option which allows more consistent priming: <https://overframe.gg/build/547234/>

A special heat inherit primer may be useful to boost heat based abilities: <https://overframe.gg/build/547236/>

For Hydroid specifically, you can use a corrosive primer to strip armor: <https://overframe.gg/build/547238/>

Weapon Option 2: Viral Heat Verglas - this deals the highest possible damage and still tags a decent number of enemies, and is capable of killing SP enemies. Clones made by Duplex Bond also have an additional chance of making energy orbs on kill.

<https://overframe.gg/build/234877/verglas/afk-steel-path-melter-companion-dps-heat-viral-verglas/>

[Seismic Bond] can be used because a SURPRISING amount of abilities satisfy the condition to activate a free 30% efficiency, which shares a list with Arcane Intention:

https://warframe.fandom.com/wiki/Arcane_Intention

Flexible Options:

Mystic Bond - only use if you dont need to shield gate using brief respite/augur mods, gives free ability casts

Aerial Bond - allows you to revive sentinel quicker, but currently has too much visual effect

Sacrifice - can revive you
