Kuva Shildeg Builds

Builds by Ninjase

Khora's Whipclaw | Viral Corrosive Statstick

Note this is the GENERAL TEMPLATE build for all [Khora] Whipclaw builds. This does NOT require [Kuva Shildeg] specifically, since many of the Incarnon Weapons are now better than it.

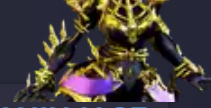

The best options for Raw elemental [Khora] are as follows in order (with or without riven):

1. [Magistar] Incarnon (with Magus Aggress): Edge of Justice (+100 base damage and 40% attack speed), Orokin Reach (+1.4 range), Critical Parallel (+16% cc/+1 CD)
2. [Sibear] Incarnon (with Magus Aggress): Master's Shatter (+20 base dmg), Resolute Force (+6s combo duration), Absolute Valor (+25% cc)
2. [Ceramic Dagger] Incarnon: Breacher's Opportunity (+120 base dmg and another +80 dmg on shield break), Orokin [Reach] (+1 range), Absolute Valor (+30% cc)
3. Kuva Shildeg (with Magus Aggress) 60% toxin progenitor
4. Skana Incarnon, Nami Solo Incarnon: with +CC evolution 4
5. Tenet Exec/Tenet Agendus with 60% toxin progenitor
6. All other weapons e.g Amphis (with riven)

With increasing disposition, a Lich/Sister melee with +60% toxin and a riven still beats Amphis with an equivalent riven.

MOD BREAKDOWN

- [Discipline's Merit]: Only needed for Incarnon weapons, allowing you to activate their incarnon form for a bonus +100% damage without consuming combo.
- Primed Pressure Point: +damage, additive to Arcane Fury
- Organ Shatter and Gladiator Might: gives +150% crit damage
- Sacrificial Steel + Blood Rush + Gladiator might: gives +770% crit chance
- Primed Fever Strike + North Wind: +255% viral damage (50% bonus against Corrupted and each viral proc increases damage)

FORMALONG
GUIDE

- Spoiled Strike: gives another +100% dmg
- [Weeping Wounds]: This is a flexible mod and can be swapped for [Spoiled Strike]. [Weeping Wounds] but adds +440% status chance at x12 combo, giving a final SC of 108%. This means each Whipclaw hit has a guaranteed status effect, split almost to 43% chance for Viral and 40% chance for Corrosive. A single viral status doubles all subsequent damage while a single corrosive status strips 26% armor, which leads to an effective damage multiplier of 2.26x compared to no armor strip. After two hits, if you manage to proc both a single viral and a single corrosive, you effectively have a final damage multiplier of 4.5x on each subsequent hit. This would be best for higher levels without priming, where it takes a few hits to kill enemies. In lower levels if you one-shot all enemies, you will not really benefit from the viral or corrosive statuses.

Other Flexible options:

[Gladiator Rush]: gives combo duration and another +110% crit chance at x12 combo

ELEMENTAL VARIANTS

Corpus: Use Pure toxin to bypass shields, swap North Wind for Virulent Scourge. Toxin Corpus version:

<https://overframe.gg/build/345034/>

Murmur: Use Pure radiation and swap elements to Electric + heat 90% mods.

Infested Deimos: Use Heat and swap elements to both heat mods.
