Default "Sweep" Attack • 360°/Spin Attack • Direct and Radial Slam Attack
"Thrust" Attack

- Average Damage Multiplier per second only applies to single-target DPS calculations.
- Note that hits marked as "Radial Slam Attack" will not apply at the epicenter of a single target and will not be accounted for in Avg Dmg Multi/s calculations.
- Combo animation lengths are approximate and are only accurate within a few tenths of a second.
- Each tile marking in stance preview gifs are 2m apart.
- Combos labeled with an asterisk (*) are shared between weapons within the same weapon family.

Acquisition

- Hysteria is a [unique stance](#) which can only be temporarily obtained through the use of [Valkyr's Hysteria](#). There are no other possible methods to obtain this stance.

Notes

- During this stance mode, Valkyr has increased mobility mid-air, performing continuous aerial somersaults.
- The final four attacks of **Fervor** have Valkyr swipe around a full 360 degrees, allowing her to attack enemies around without needing to change directions. Due to Hysteria's high power nature, this can clear tightly-knit crowds quickly.
- Unlike other weapons that use this slide attack, **Launching Spring** makes Valkyr spin quickly 3 to 4 times before delivering an uppercut, which can deal up to a 5-hit combo against a single target, or 4 hits against multiple enemies.
- Unlike **One Point** utilized by other fist-using stances ([Fists](#), [Claws](#) and [Sparring](#)), **Frenzy** accelerates Valkyr downwards instead of letting her float in the air as she waits to strike the ground.*
- **Roaring Drums** does **25%** bonus [Impact](#) damage.
- This stance can not be ranked up manually and instead ranks up with the ability rank of [Hysteria](#). There is also no benefit to ranking up the stance.

* - Requires further testing/May be an unintended bug

Trivia

- The stance was previously categorized under " [Furax](#)" instead of "Valkyr Talons".
- Hysteria is one of five identified stance mods that are exclusive to a Warframe instead of a weapon type, the other four being [Excalibur's](#) [Exalted Blade](#), [Wukong's](#) [Primal Fury](#), [Baruuk's](#) [Serene Storm](#), and [Sevagoth's](#) [Exalted Shadow](#).
- Oddly enough, before [Hotfix 14.0.6](#) (2014-07-22), the mod card appeared to be a background-less version of [Voltaic Strike](#). This was changed as of [Hotfix 14.0.6](#) (2014-07-22), where the image was replaced with a grey-grid.
- Although having lost characteristics where Valkyr would float mid-air when attacking during Hysteria pre-Update 14, if a player attacks off a downward slope, Hysteria will momentarily let Valkyr attack regularly while in mid-air, followed shortly with **Frenzy**.
