stealthbomber wisp

[Innodem], [Glaive], or [Hate] incarnon with motus. [Rauta] with motus for 100% knockdown immunity in the air. can swap out for [Glaive] or [Hate] incarnon although [Innodem] has the perk of being an incarnon which means better stats overall than [Glaive] and [Innodem] has better incarnon bonuses than [Hate]. you really don't need a secondary with this build.

wrathful adv over 4 bc natural synergies with strategy: main weapon of choice is a ranged melee weapon - [Innodem], [Glaive], [Hate], etc. wrath adv also resets your bullet, and double jump upon usage which means you can quite possibly just stay in the air forever. if that's your real goal, replace [Blind Rage], [Precision Intensify], [Narrow Minded], and [Primed Continuity] with [Fleeting Expertise], [Archon Flow], [Streamline], [Boreal's Hatred], [Endurance Drift], or any combination thereof. [Transient Fortitude] is also an option since negative duration essentially functions as cooldown reduction for wrath adv resets.
