The opkg update command failed with code 6? Help needed!

Hello everyone!

My opkg update both thro LUCI and CLI doesn't wanna update, while my internet is getting routed fine.
It's outputting this error:

```
Failed to send request: Operation not permitted
Failed to send request: Operation not permitted
Failed to send request: Operation not permitted
Failed to send request: Operation not permitted
Failed to send request: Operation not permitted
Failed to send request: Operation not permitted
Collected errors:
```

```
• opkg download: Failed to download
```

It may be part of the letsencrypt CA expiry.

They route the internet fine

What about DNS?

For example, you can `ping 8.8.8.8`, but can you `ping google.com` ?

⊖ ↑ 2 ↓ ○ Reply ...

yourrandomnobody OP • 3y ago •

Yes, I've forgot to mention this! When using the pinging in the Diagnostics tab, I'm getting this error when trying to ping openwrt.org:

```
ping: bad address 'openwrt.org'
```

or

```
PING 8.8.8.8 (8.8.8.8): 56 data bytes
ping: sendto: Network unreachable
```

or

```
ping: bad address 'google.com'
```

I am using the IPv4 pinging from there

Oh, good catch! I missed that dhcp wasn't enabled.

 2   [Reply](#) ...**yourrandomnobody** OP • 3y ago •

Gateway in the Mi router (openwrt) is set to my LEDE router, however to no avail :/
tyvm for the tip tho!

 1   [Reply](#) ... 16 more replies**principe1218** • 2y ago •

If anyone else runs into this problem.

I had to disable WAN6 interface, since for some reason my Modem/router was not routing IPv6 from inside (between OpenWRT and Modem) to external.

 2   [Reply](#) ... 1 more reply**[deleted]** • 1y ago •

Had the same problem, disable IPV6 in every device in network > interface > devices. Restart the router.

 2   [Reply](#) ...**lyndonguitar** • 2mo ago •

Late to the party but what actually fixed it for me was changing the timezone and matching the dates within the router. nothing else I did fixed it
