# Partitioned Mallet

EDIT

**Partitioned Mallet** is a [Warframe Augment Mod](#) for [Octavia](#) that allows her to summon two [Mallets](#) with reduced range.

## Stats

| Rank | Range reduction | Cost |

## Notes

- Two Mallets **cannot** be placed within each other's radii.<sup>[1]</sup>
  - It is, however, possible for a  [Resonator](#) carrying a Mallet to enter the radius of another Mallet, or for 2 Mallets' radii to overlap if both are under the effects of  [Amp](#).
- The damage ticks from both Mallets can affect the same enemies, provided they are within the radius of both.
- Resonator can only carry **1** Mallet. If Resonator is summoned while both Mallets are present, it will go for the closest one.
- Amp only affects the last Mallet summoned, unless the radii of both Mallets are in Octavia's sight.
  - If Mallet is recast while Amp is active, Amp must be recast for that Mallet to benefit from it.

[Update 32.0](#) (2022-09-07)

### WARFRAME AUGMENT BUFFS PART 2

In Update 31.2, we buffed a number of underused Warframe augments. The time has come to continue this work! This batch tackles Warframes from Loki to Rhino (of which there are surprisingly many!). We have increased their viability in missions, which we hope will encourage more build diversity.
