Are there any good movie streaming websites/apps with decent servers? The one's I use are unwatchable.

[Discussion](#)

I've used websites like [ev01.to](#), [hurawatch.at](#), [moviesjoyhd.to](#), [lookmovie.to](#) and apps like Popcorn time before it got removed, but all of them have terrible loading speeds, movie stops playing every 10 seconds or so. I did think about getting a subscription of the streaming services provided by the "big companies" such as Prime video, Netflix and Disney+, but that is also not really an option considering they don't have very extensive libraries except for Netflix which is the most expensive one. Any recommendations?

Posted this quite a while ago but the suggestions keep on coming so I'll leave all the links from the comments below:
