NIDUS PRIME BUILDS

BUILDS BY NINJASE

Insatiable Hunger Nidus | Steel Path Endurance

Endurance based [Nidus] build utilising fast stack gain for survival via Undying passive (5s iframes on taking fatal health and lose 15 stacks, meaning you just need to be able to gain 15 stacks in 5s to stay immortal), big range for grouping and armor strip which allows Virulence, [Larva Burst] and Ravenous to actually deal damage in SP.

[Insatiable], spamming virulence and killing enemies in larva all promote very fast stack gain, as long as you cast larva frequently and try to stand in ravenous. You may not even need to use virulence very often once you hit 100 mutation stacks.

MOD BREAKDOWN

- [Insatiable]: New [Insatiable] augment now scales with strength. At 214% strength, you have a 128% chance to general additional stacks, i.e. a 28% chance to generate two extra stacks and 100% chance for one extra stack.
- Primed Continuity/Archon variant: Positive duration means you dont need to recast either link or ravenous too often (depending on which one you keep). [Archon Continuity] variant is completely optional but allows larva burst to also proc corrosive, which gives a free status effect for condition overload effects.
- Primed Flow: More energy
- Overextended, Stretch, Cunning drift: Range for larva and Link
- [Blind Rage], Precision Intensify, Molt Augmented: Strength for Virulence, Larva Burst damage and subsume ability.

FLEXIBLE OPTIONS

- [Larva Burst]: Optional augment [Larva Burst] allows you to quickly end larva for ZERO energy cost then recast when needed, rather than wait for the incredibly long duration of 11s to expire in case an enemy gets stuck in the map. When enemies are armor stripped, [Larva Burst] can also do up to

GUIDE

- Teeming Virulence: optional augment to boost primary crit chance

Acanes

Completely flexible

- Augmented : more strength to boost insatiable
- Strike: if you are using melee
- Precision/Velocity: if you are using a pistol
- Rage/Acceleration: if you are using a rifle

Archon Shards

- Two Amber Cast speed shards
- Remaining three up to preference eg three Crimson Strength shards or Violet Melee Crit damage shards if using melee

HELMINTH

In endurance, 90% damage reduction from parasitic link becomes useless so we can subsume over this slot. If you prefer to keep link, just subsume over Ravenous and drop Insatiable augment for more range or strength. If you do subsume over Link, you will want to put Primed Sure Footed in exilus.

- Silence : helps block eximus and acolyte abilities as well as cause a temporary 2s stun on enemies
- Tharros Strike: Full armor strip at 200% strength, affecting all enemies in larva, and also acolytes/demolysts/thrax units.
- Roar: Boosts damage of Virulence and [\[Larva Burst\]](#), but means you need to run external armor strip like Unairu or [\[Latron\]](#) Incarnon.
