Melee Combo

[COMMENT 12](#) [EDIT](#)

*For stance combos, see [Stance](#).
For the combo mechanic associated with Sniper Rifles, see [Sniper Rifle](#).*

Melee Combo is a power source that grows as the Tenno strikes or blocks with melee weapons, multiplying the damage of certain attacks. [Heavy attacks](#) consume the melee combo gauge, called the **combo counter**, for a burst of damage (from **1x** to **12x**).

Certain Warframe abilities also benefit from melee combo, and they do **not** consume combo points, but they receive **1/4** of the added damage. Normal melee attacks are **not** affected by the combo multiplier, though [combo scaling effects](#) and mods can apply to

melee attacks. An inactive melee combo resets to zero after **5** seconds.

Combo Gain

Attacking or blocking grants combo points dependent on different values and bonuses.

Stance Attacks

Stance attacks (that is, most melee attacks) add combo points, scaling with the attack's stance damage multiplier (**100% stance damage multiplier = 1 point**). For example, an attack with a **300%** damage multiplier, adds **3** combo points per hit. Only successful strikes against an enemy will award combo points.

Some exceptions to these values exist, such as the last attack of [Swirling Tiger's](#)

ng each individual projectile.

Other Attacks

- Stealth and finisher attacks add varying amounts of points to the combo counter.
- Melee hits against destructible objects, like [Storage Containers](#), do **not** add to the combo counter.
- The  [Rauta](#) generates **2** combo points for each [pellet](#) that lands on an enemy, up to a maximum of **28** combo points spread across **14** pellets.

Additional Combo Count Chance

Certain mods supply additional combo count chance (ACCC), awarding an extra combo point either on hit, on block, or under other specific circumstances. ACCC starts at +0% and benefits additively from the following mods and effects.

The Bonus Damage Multiplier starts at 2.0x after 20 consecutive hits. The multiplier is increased by 1.0x every consecutive 20 hits until 220 consecutive hits have been made, at which point the bonus damage multiplier will cap at 12.0x. Heavy Attacks receive the full damage multiplier, while affected [#Warframe Abilities](#) receive 1/4 of the multiplier.

Combo Counter Bonus Tier	Heavy Attack Multiplier	Base Damage Multiplier (Certain Warframe abilities)	Minimum Consecutive Hits Required
2	2.0x	1.25x	20
3	3.0x	1.5x	40
4	4.0x	1.75x	60
5	5.0x	2.0x	80
6	6.0x	2.25x	100
7	7.0x	2.5x	120

12	12.0x	3.75x	220
13 (only with Venka Prime)	13.0x	4.0x	240

[Venka Prime](#) has a passive ability that allows it to reach 240 consecutive hits for a 13.0x multiplier.

[Dex Nikana](#) has a passive ability that reduces required consecutive hits down to 11 at the cost of lowering max multiplier to 11.0x

or by adding to the Combo

—In-game Description

Combo Duration extends the combo timer from its default of **5** seconds, increasing the time a combo takes to reset. Visually, the combo timer is represented by a grey horizontal bar below the combo counter.

[Riven Mods](#) can include positive or negative combo duration. (See: [Riven Mods#Attributes](#) for values.) A zero or negative combo duration prevents increasing the combo counter.

Melee Combo duration cannot be reduced to below **0.1** seconds.

Warframe Abilities

Certain melee-oriented Warframe abilities benefit from and contribute to the melee combo counter. These abilities include the following. (tribute to combo count)

- [Khora's Whipclaw](#)
- [Kullervo's Recompense](#) and [Storm of Ukko](#) (contributes to, but does not benefit from combo count)
- [Exodia Contagion](#)
- [Exodia Force](#)

Exalted Weapon

Exalted Melee Weapons like [Excalibur](#)'s [Exalted Blade](#) have their own independent melee combo, governed by its own combo count, multiplier, and expiration. Striking with an exalted melee weapon raises its own exalted combo counter and **not** the main combo – and vice-versa. A holstered weapon's combo timer expires at the normal rate.

Tips

- Tenno can reset their combo duration with no enemies nearby, by using a heavy attack paired with heavy attack efficiency (some points will still be spent), because the combo duration timer resets on heavy attack regardless of whether enemies are struck.
