What streaming sites are you currently using for TV shows?

Discussion

Was going robin hood 2006 series. On putlocker, it is a 'buffering' thing that can get annoying at times but good quality. Gomovies if I am quick enough for right click-download and/or get the captcha before the right click-download in time. Every time redirect. Months ago it used to be just click a few times-close a few windows and now it redirects after like 10 seconds with no limit every time i hit back button. It didn't use to do it. I am trying to use combo of torrents, streams (putlocker), and downloads to catch up on old shows at 2x speed and such. What stream-download sites are good for latest since mixdrop is caput for time being. I am asking cause many of the sites on the megathread link to sites that make use of the upcloud/vidcloud/mixdrop functions and looking beyond those.

The best site HANDS DOWN Lookmovie2.to

It's not even close.

No stupid annoying pop ups. Has everything. Cleanest site I've ever used. You're welcome.

Has anyone been able to find a working site for PS5? I've tried every site that people have listed on this thread and not a single one have worked for me. The furthest I get is on any of these sites is searching what I want to watch, then it redirects me to a verification screen that it won't allow me to get out of
