Voice Attack Speech Recognition

[Help](#)

Hey!

So I recently re-installed Voice Attack and some HCS voices and tools, trained windows for my voice... but it's doing very badly, not understanding a single word I say. which is strange since it was working before

I was looking through the options for Voice Attack and I found you could change the default speech engine, I only have the default MS one but that got me thinking, can you download a different (and better) speech engine and use it in Voice Attack. So if you know of any speech engines and how to download them, please say so!

Kind Regards

Commander Jeff Clark

letting the PC (or laptop) speaker pick things up it might not work as well.

Also, you can check your audio software. For example on my laptop I have a Dell Audio app whose microphone settings (since I'm using a microphone) can dramatically affect VoiceAttack.

Good luck commander!

Did you go into control panel on windows and do voice training? I am using the default engine and it picks everything up perfectly

I have a Raxxla theory, but I need a lot of help to set it in motion. My hypothesis is that we need to remove the Mother Gaia faction from Sol and the only other system they have influence in, Wise 0855-...
