## Bugs

- Despite originally being a conclave only mod, the buff does not actually function in conclave. The icon appears, but no additional damage is given. It is possible the buff is only broken for non-host players.
- [Latron Incarnon Genesis](#) bugs:
  - Only the AoE benefits, not the direct damage.
  - Switching forms snapshots the current buff value and duration, restoring it upon switching back. For example, if incarnon form is deactivated while the buff shows 140%, stacking normal form to 400%, then switching to incarnon

will lose the 400%, and be replaced with the previous 140%. Then, as soon as incarnon is lost, the 400% will be restored.

## Notes

- Can also be equipped on the [Latron Wraith](#) and the [Latron Prime](#).
- Cannot be equipped simultaneously with [Hydraulic Gauge](#), [Loose Hatch](#) or [Maximum Capacity](#).
- Consecutive hits on enemies increase the damage bonus by 20%, stacking 20 times up to a maximum of +400% bonus damage. The buff lasts for 2 seconds or if the next shot does not hit an enemy, after which all stacks are removed.
  - Hitting objects such as [Zephyr's Tornado](#), [Nullifier Crewman's bubble](#), or an Arctic [Eximus' globe](#) are counted as a 'miss' and will reset the damage bonus.
- Multiplicatively stacks with damage bonuses like [Serration](#) and [Faction Damage Bonus](#).
- Additional hits caused by [punch through](#) or [Multishot](#) will allow each bullet to trigger multiple stacks. When a shot hits at least one enemy it will not reset the bonus.
  - Each direct hit from [Latron Incarnon Genesis](#) and its ricochets will stack the buff. If the projectile hits a wall before hitting an enemy, it will count as a miss and the damage bonus will reset.
- The bonus is applied on hit to all pellets as  $\text{damage} * 20\% * (\text{hits} - 1)$ , meaning without multishot, the bonus isn't applied until the second hit. With multishot, not only does the bonus ramp up faster, but also some of the post hit bonus is applied to the hit. For example, with a modded multishot of 3, the first trigger pull would do +40% bonus damage, the second +100%, the third +160%, and so on.
- Bullet attraction bubbles such as [Magnetize](#) or [Void](#) status will cause each hit to count twice.

## Trivia

- [Aero mods](#) used to increase the buff duration by 1 second each, up to 4 seconds total due to a helpful bug.

## Patch History

[Hotfix 33.6.9 \(2023-09-12\)](#)

WARFRAME Wiki

- Fixed Latron Prime's Incarnon Mode not benefitting from the Double Tap Mod.

### [Hotfix 33.6.7 \(2023-08-31\)](#)

- Fixed several issues with Double Tap's buff indicator:
  - (Latron and Latron Wraith) Fixed the buff indicator being stuck at 100% and not adjusting based on hits.
  - (Latron Prime) Fixed the buff icon not showing up in the HUD (this was a
