Y'all think dragons dogma 2 is going to have a big dlc as dark arisen

[Discussion](#)

I didn't play the game back then probably because I was still learning basic math so I don't know how long it took to be release or even if it was a dlc cause the normal nowadays is just dddd. So if we were getting one how long will it take to release. I know the game just released but one gotta think in big.

Yeah it definitely will. I want a hard mode too.

The game definitely needs a hard mode

It's crazy that hard mode wasn't in the original DD either so will very likely be an addon.

Definitely and we know exactly what it's called and when it's going to come out:

I was so immersed in the game and held off on doing "main" quests for so long and still just no more than 10 or so quests I already reached the end? Maybe I'm stupid for being unaware or not playing the game right, I don't know but whatever...at least I got 4 or so good days of complete immersion and that has to do.

Not sure but don't want to get my hopes up. DD2 has been my second fav game this gen but also the biggest disappointment with how much stuff is just....missing. I hope the DLC is the equivalent of DA, we really need it.

the dlc of dark arisen wasn't really big tho, if you skip the gear apraising you would probably finish it in an hour and 30 minutes.

so ye i think it will be bigeer, maybe they will add a snowy biome. would be nice to play around with the same snow physics as monster hunter world but in dragons dogma 2

They'd better, at most 2 new classes and at least 6-10 new monsters with a new large zone would be a minimum because the vanilla content is rather disappointing. I also hope that in the meantime they'll add some mini-dlc or updates that add skills to the current classes, for example.

I hope this game gets at least 2 DLCs, one DA like and one on a new part of the map

So it's pretty well known that console is getting an update to become polished like the PC version but I have a question
