Do I need to add soy lecithin to an MCT Oil Infusion

I want to make a 7tbsp MCT oil infusion with 14g of flower. How much soy lecithin should I add if any? I plan to take it straight or add to tea. Supposedly MCT preforms better and is easier to use than coconut oil.

1.5 to 5.5 is a 27% ratio, and 3.5 to 3.5 is a 0% ratio. When you're calculating a ratio, you compare one number to another. It's a significant misunderstanding of BrassNWoc's point (that the ratio is around, but it makes a difference)

I had these distillate edibles sitting for about a year. I'm wondering if they are still safe to eat? What is the chunky white stuff?
