Best Inexpensive or Price/Performance Receiver?

Firstly I recognize that this post might be met immediately with read the FAQ but I tried to read the linked FAQ and the "I have \$XXX for Y product" pages that are linked but they have all been removed and archived. The mods might want to refresh those links. I was trying to find information on what receivers are recommended at each pri...

\$1,500-\$2,000 to spend on speakers + amp (or receiver). What are you going with?

Currently rocking KEF Q150s powered by an SMSL AD18. Also have a cheap JBL sub (but I'll prioritize upgrading the sub with a different budget later, as right now I'm focused on mostly speaker improvements). Quick first question: If I would be only using this sound system for bluetooth connectivity (both from my phone and my tv,...

Help me choose: Q150/RP-600MII/R50M/Dali Oberon3

Hi all, long time lurker, first time audio enthusiast. I'm putting together my first hifi system for a medium living room open concept modern house. Vinyl only 2 channel setup. I enjoy a variety of music but no heavy metal. In Canada so prices are a lot higher. I have a Yamaha RS300 amp and Fluance RT82 turntable. Bought Klipsch R50M on a...

Elac DCB41 USB Sleepmode

Hello everyone, I have a problem with my Elac DCB41 speakers. They are connected via USB to my iMac M3. When there is no audio, they seem to go into sleep mode, because any sound I play afterward (YouTube video, Apple Music, etc.) starts with a delay of about one second. The sleep mode kicks in immediately – even if I skip...

Preamp + Speakers for a record player

I have max budget of 500 for speakers and a preamp, I am planning on getting a Rega planar 2. I don't know much about speakers but I know that I need an amp in the speakers. Any help is appreciated, thanks

Vintage speaker brands to avoid?

They often pop up on marketplace, looking vintage and sexy, with a random price tag. But on Reddit I see *unanimous* opinion to avoid them. Technics, Akai...etc. So, what's your ultimate "I know what you're thinking, but nope" list on vintage speakers? Now, I don't know any better than the ones selling it but I appreciate the aestheti...

Best budget setup for TV, TT, Spotify (BT)

Total noob but received a nice turntable as a gift. Will be placing it in the living room where the TV is. Main speakers for TV then TT then BT. Budget is around \$400. Looking for something really small, looks nice. Currently looking at the Kanto Yu6 as it doesn't need a phono and amp anymore. I guess that's the easiest setup and withi...

PreAmp with 2 AUX-in, Bluetooth and at least 2 AUX outputs

I am searching for a cheap (headphone-) amp that features 2 AUX inputs as well as Bluetooth and at least 2 AUX outputs (jack > cinch). I will be using it for playbacks and clicker when practicing on my drumset. Since I am lazy and don't want to keep unplugging cables, I need multiple in- and outputs....

Help: Polk XT20 or Paradigm Monitor SE Atom

I'm so torn between these 2. Assuming they're both the same price (within \$20) - which would you choose? Would love to hear from anyone who has heard both. Looking to do a 2.1 bedroom setup 50/50 music vs home theatre. Thanks very much!

I'm looking for extra budget option to get Spotify streaming in small form factor. Is the Audiocast M5 connected to Fosi Audio V3 at 48V will be enough to get Spotify streaming going on? Does Audiocast M5 have some equalizer onboard so I can alter the sound in any way? Any better streamers than M5 for 25USD on AliExpress? The...
